Siddiqui, Makoto Tanaka, 2020-04-25 This book covers game theoretic approaches to analyzing policies for environmental regulation in the power sector The scope includes operational and investment decisions in imperfectly competitive electricity markets as well as transmission planning and policy design Given this context this book synthesizes equilibrium and bi level modeling to address challenging research questions such as How are power plant operations affected by carbon policy such as cap and trade C T systems How does market power in electricity generation affect market outcomes and CO2 emissions How does a strategic firm with first mover advantage manipulate both electricity and C T permit prices How does a strategic firm with first mover advantage invest in new generation capacity under a C T system How does sustainable transmission planning adapt to an imperfectly competitive power sector How should a renewable portfolio standard RPS target be revised in an imperfectly competitive power sector This book includes plenty of illustrative examples to facilitate the concepts comprehension It is intended to make equilibrium and bi level models adapted for policy assessment accessible to graduate students academic researchers industry practitioners and policy analysts

Re-Thinking Green Robert Higgs, 2005-07-15 Environmental quality has been a major public concern since the first Earth Day in 1970 yet the maze of environmental laws and regulations enacted since then has fostered huge government bureaucracies better known for waste and failure than for innovation and success Can we do better than this failed environmental bureaucracy The noted contributors to this volume answer with a resounding yes Re Thinking Green exposes the myths that have contributed to failed environmental policies and proposes bold alternatives that recognize the power of incentives and the limitations of political and regulatory processes It addresses some of the most

hotly debated environmental issues and shows how entrepreneurship and property rights can be utilized to promote environmental quality and economic growth Re Thinking Green will challenge readers with new paradigms for resolving environmental problems stimulate discussion on how best to humanize environmental policy and inspire policymakers to seek effective alternatives to environmental bureaucracy

Ecosystem-Based Management, Ecosystem Services and Aquatic Biodiversity Timothy G. O'Higgins,2020 Aquatic ecosystems are rich in biodiversity and home to a diverse array of species and habitats providing a wide variety of benefits to human beings Many of these valuable ecosystems are at risk of being irreversibly damaged by human activities and pressures including pollution contamination invasive species overfishing and climate change Such pressures threaten the sustainability of these ecosystems their provision of ecosystem services and ultimately human well being Ecosystem based management EBM is now widely considered the most promising paradigm for balancing sustainable development and biodiversity protection and various international strategies and conventions have championed the EBM cause and the inclusion of ecosystem services in decision making This open access book introduces the essential concepts and principles required to implement ecosystem based management detailing tools and techniques and describing the application of these concepts and tools to a broad range of aquatic ecosystems from the shores of Lough Erne in Northern Ireland to the estuaries of the US Pacific Northwest and the tropical Mekong Delta
