The Encyclopedia Of Australian Architecture:

    The Encyclopedia of Australian Architecture Philip Goad,Julie Willis,2011-10-31 Behind the iconic images of Australian homesteads beach houses and the billowing sails of the Sydney Opera House lies a rich and enthralling history of how Australians have responded to natural and urban environments and in turn shaped Australian culture and society The Encyclopedia of Australian Architecture is the first major work of reference to be published on Australian architecture This magnificent book documents and analyses Australian architecture and architects from indigenous beginnings to colonial modern and contemporary eras With over 1000 entries from 200 contributors and 500 photographs and drawings The Encyclopedia of Australian Architecture provides an unparalleled compendium of architectural knowledge It is essential reading for all who care about the built environment   *A Critical History of Contemporary Architecture* Dr Elie G Haddad,Asst Prof David Rifkind,Ms Sarah Deyong,2014-03-28 This book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 The first section provides a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects   *Constructing Faith in the Antipodes* Lisa Marie Daunt,2025-12-10 Over 1 650 churches were built in Queensland Australia between 1945 and 1977 They constitute some of the most notable modern architecture in the state and reveal tensions surrounding modernism s role in cultural expression and regional identity While much research has focused on post war modern church architecture in the Global North little has been done on the Global South This book offers a particular perspective on modernist church architecture differing from accounts of buildings in the northern hemisphere as it highlights how church architecture in Queensland was shaped by its very specific time and place a young and developing state covering a vast area of land sparsely populated highly multi denominational and located in the antipodes Modern architectural developments and emergent religious ideas did not simply transfer to Queensland Rather architectural ideas were circulated globally allowing for a global narrative This landmark study seeks to broaden views and methods for future research both locally and internationally Richly illustrated Constructing Faith in the Antipodes combines both a chronological and a thematic approach to narrate modern church architectural history and offers a fascinating glimpse into a distinct collection of modern church buildings   **Brutalism Resurgent** Julia Gatley,Stuart King,2018-02-02 Brutalism had its origins in b ton brut concrete in the raw and thus in the post war work of Le Corbusier The British architects Alison and Peter Smithson used the term New Brutalism from 1953 claiming that if their house in Soho had been built it would have been the first exponent of the New Brutalism in England Reyner Banham famously gave the movement a series of characteristics including the clear expression of a building s structure and services and the honest use of materials

in their as found condition The Smithsons and Banham promoted the New Brutalism as ethic rather than aesthetic privileging truth to structure materials and services and the gritty reality of the working classes over the concerns of the bourgeoisie But Brutalist architecture changed as it was taken up by others giving rise to more sculptural buildings flaunting their raw materials including off form concrete often in conjunction with bold structural members While Brutalism fell out of vogue in the 1980s recent years have seen renewed admiration for it This volume is consistent with this broader resurgence presenting new scholarship on Brutalist architects and projects from Skopje to Sydney and from Harvard to Haringey It will appeal to readers interested in twentieth century architecture and modern and post war heritage This book was originally published as a special issue of Fabrications the Journal of the Society of Architectural Historians Australia and New Zealand

   Health and Architecture Mohammad Gharipour,2021-05-06 Health and Architecture offers a uniquely global overview of the healthcare facility in the pre modern era engaging in a cross cultural analysis of the architectural response to medical developments and the formation of specialized hospitals as an independent building typology Whether constructed as part of Chinese palaces in the 15th century or the religious complexes in 16th century Ottoman Istanbul the healthcare facility throughout history is a built environment intended to promote healing and caring The essays in this volume address how the relationships between architectural forms associated with healthcare and other buildings in the pre modern era such as bathhouses almshouses schools and places of worship reflect changing attitudes towards healing They explore the impact of medical advances on the design of hospitals across various times and geographies and examine the historic construction processes and the stylistic connections between places of care and other building types and their development in urban context Deploying new methodological interdisciplinary and comparative approaches to the analysis of healthcare facilities Health and Architecture demonstrates how the spaces of healthcare themselves offer some of the most powerful and practical articulations of therapy   The Encyclopedia Americana ,1985   **Shifting Views** Andrew Leach,Antony Moulis,Nicole Sully,2008 Shifting Views draws together a selection of writing from across twenty five years of these conferences to provide a fascinating view into the region s architectural history discipline The essays collected here from such diverse thinkers as Judith Brine Joan Kerr Miles Lewis Sarah Treadwell Philip Goad Julie Willis and Mike Austin reflect some of the most illuminating debates from these conferences Together these essays capture a tone of critical inquiry and the conditions of writing architectural history in Australia and New Zealand Shifting Views takes us into the mechanics of architectural history making exposing its foundations and demonstrating how they can be called to account It shows us how architectural history has been made and revised giving us a glimpse of the means why which our past becomes our history BOOK JACKET   The Encyclopedia Americana ,1927   The Encyclopedia Brittanica ,1929   The Encyclopedia Americana Frederick Converse Beach,Forrest Morgan,George Edwin Rines,E.
