Revolution taking a geoeconomic approach which encompasses economics international political affairs history and geography The book confirms the causalities between GEDs and GHEs It is a pioneering work that provides a unique but powerful policy implication in order to alleviate international conflicts and tensions between superpowers it is necessary to reduce GEDs And since it is virtually impossible for a few superpowers to reduce the GEDs the world economy needs a multipolar economic system for global stability through competition The book was written shortly after the world economy was trapped within downward spirals caused by the US financial crisis and its contagion As a collective representation of GEDs in various areas the financial disparity is a central part of GEDs The book rigorously examines the financial crisis 2008 2014 in the United States and the Fed s response a program of quantitative easing QE implemented in three phases while bearing in mind that the origin of the current crisis is not solely the financial sector or stock markets but worldwide economic disequilibrium This book also focuses on the details for the causal relationships prevailing in several major areas human resources raw materials energy environment and poverty
