**An Introduction to Teaching Composition in an Electronic Environment** Eric Hoffman,Carol Scheidenhelm,2000

An Introduction to Teaching Composition in an Electronic Environment is designed for instructors who have an average knowledge of computers overall and very little training or experience on how they can be used beneficially in the composition classroom. As such, the book focuses on offering practical explanations and specific ideas for lesson plans that can easily be incorporated into class time. The book is divided into two parts. The first section explains the basics of the three main computer tools used in composition: word processor, e-mail, and the World Wide Web, and focuses on some basic ways these tools can be implemented for teaching writing. While the material assumes some basic knowledge, major concepts and terminology are always explained and defined fully. The second section addresses more directly the application of technology in the classroom. It includes practical advice on preparing for a course with an electronic component and what to do the first few days of class. This section also includes a series of lesson plans categorized according to pedagogical goals and technological requirements. A third section includes trouble-shooting guides for common problems in the lab, a glossary of computer terms, sample Web pages that teachers can adapt for their courses, a section on Netiquette, and an index of on-line writing and grammar resources on the Web. For teachers of college-level writing, Technologies in the Second Language Composition Classroom (Joel Bloch, 2008) grounded in applied linguistics research and composition theory and practice encourages teachers to explore the role technology can play in the acquisition of writing for second language students. This research-based volume supports the incorporation of technology into classrooms, providing students with motivation and tools to develop their writing skills. The book provides not only an intellectually engaging perspective on the on-going debates regarding technologically enhanced writing and writing pedagogy, but it also delves into the technologies themselves, from blogs and blogging to computer-mediated discourse and concordancing. Technology is a growing and rapidly evolving presence in academia, and Joel Bloch brings an informed approach to understanding its place and potential benefits in the classroom. Each chapter includes reflection questions that will help individual readers apply the theories and ideas to their own classrooms. This book will interest ESL teachers in training, teacher educators, current ESL instructors, and researchers and scholars in the area of ESL writing and technology.

*Teaching the Language Arts* (Cathy Collins Block, 2001) explains and demonstrates with a clear step-by-step approach how communication and thinking competencies can be enhanced through instruction. This revision elaborates further on a language arts program built to focus on the needs of individual students. Each of the fourteen chapters is divided into three sections covering theoretical foundations, practice, and professional development, giving the text a practical, usable organization. The second and third sections apply the principles from the first section to the classroom. Features in these sections show specific teaching strategies that offer practical ideas for teachers to develop an ongoing and successful teaching repertoire. For Language Arts teachers, **English Journal**, 2003; **School Library Media Activities Monthly**, 1999; Vertical File Index, 2005; **Middle and High School Teaching** (James A. DuPlass, James A. Duplass, 2006) Middle

and High School Teaching Methods Standards and Best Practices is an interactive textbook that is fully integrated with PowerPoint slides, a web site, assessments to meet NCATE and INSTASC standards, and basal secondary level textbook chapters for each of the content areas: English, Mathematics, Science, Social Studies, World Languages, Fine and Performing Arts, and Physical and Health education. Providing unique coverage for differentiated instruction at the college level, the text integrates standards and methods for general and specific subject matter by drawing on professional education association web sites covering traditional methods, topics, and providing authentic assignments. The text is ideal for courses in secondary general methods curriculum and instruction, introduction to teaching, or for the first course of a two-part sequence in specific methods. Web-based resources including PDF copies of middle and high school basal textbook content, lesson planning templates, ERIC documents for current issues, and PowerPoint slides for each chapter enable professors to easily choreograph their instruction for classes of mixed majors or single major and courses of varying size that may be taught completely or partly online. The book and its ancillary materials scaffold the learning experience by presenting topics in a logical sequence beginning with an introduction to the challenges of the profession, followed by differences between middle schools and high schools, basic skills across the curriculum, approaches to teaching diverse learners, planning methods and assessment, and concluding with trends, standards, and differences between the disciplines. Instructors can choose from and modify more than 100 authentic assignments which are tied to NCATE and INTASC standards ranging from interviewing middle school students to creating lesson plans. In addition, special emphasis is placed on such topics as motivation theory and techniques for diverse learners and integrating basic skills and literacy into subject field planning and instruction. Straightforward, easily readable, and concise, the text is organized into compact topics rather than dense chapters and includes a Best Practices feature which engages students in reading their textbook. Authentic content chapters from middle and high school textbooks, available at the web site, downloadable PDF copies of basal textbook chapters from McDougal Littell across the subject areas, enable students to apply methods learned from the textbook's lesson planning activities and assignments. More than 100 potential assignments, which instructors can select and modify, are presented to best suit their students and course needs. Each assignment is tied to an INTASC or NCATE standard for ease of documentation or portfolio development. Coverage and integration of key national standards: The Interstate New Teacher Assessment and Support Consortium, INTASC standards, The National Council for Accreditation of Teacher Education, NCATE standards, The Goals 2000 legislation, The No Child Left Behind legislation, and the content standards defined by the professional organizations into a coherent structure for preservice teachers. Practical pedagogy. Supportive features include Teacher's Tips boxes with practical ideas and strategies for the classroom, Question boxes to encourage critical thinking, For the Reflective Practitioner quotes and insights, authentic Assignments lists of Best Practices, and web resources.
