Sacco,2009 Biochemical engineering is the application of engineering principles to conceive design develop operate and or  
use processes and products based on biological and biochemical phenomena Biochemical engineering influences a broad  
range of industries including health care agriculture food enzymes chemicals waste treatment and energy among others  
Historically biochemical engineering has been distinguished from biomedical engineering by its emphasis on biochemistry  
and microbiology and by the lack of a health care focus This is no longer the case There is increasing participation of  
biochemical engineers in the direct development of pharmaceuticals and other therapeutic products Biochemical engineering  
has been central to the development of the biotechnology industry given the need to generate prospective products on scales  
sufficient for testing regulatory evaluation and subsequent sale This book begins with a review of biodiesel processing
