updated for recent developments including Pensions Stock options Derivatives Provisions Leases Revenue recognition Foreign currency The text also sets out the key differences between IFRS and US GAAP treatments of these issues in addition to their implications for analysis A detailed case study is used to provide a step by step valuation of an industrial company using both free cash flow and economic profit methodologies The authors then address a range of common valuation problems including cyclical or immature companies as well as the specialist accounting and modelling knowledge required for regulated utilities resource extraction companies banks insurance companies real estate companies and technology companies Accounting for mergers and disposals is first explained and then illustrated with a detailed potential acquisition
