Satellite-based Applications on Climate Change John Qu, Alfred Powell, M.V.K. Sivakumar, 2013-03-19 Climate and other environmental changes are drawing unprecedented concern and attention from national governments international organizations and local communities Global warming has left noticeable impacts on the environment and the ecosystems it supports including humans and has important implications for sustainable economic and social development in the future Satellite observations of climate and environmental change have become an increasingly important tool in recent years in helping to shape the response of international communities to this critical global challenge The book presents the latest advances in satellite based remote sensing of the Earth s environment ranging from applications in climate and atmospheric science to hydrology oceanography hydrology geomorphology ecology and fire studies Introductory chapters also cover key technical aspects such as instrumentation calibration data analysis and GIS tools for decision making

Land Use and Land Cover Mapping in Europe Ioannis Manakos, Matthias Braun, 2014-07-08 Land use and land cover LULC as well as its changes LUCC are an interplay between bio geophysical characteristics of the landscape and climate as well as the complex human interaction including its different patterns of utilization superimposed on the natural vegetation LULC is a core information layer for a variety of scientific and administrative tasks e g hydrological modelling climate models land use planning In particular in the context of climate change with its impacts on socio economic socio ecologic systems as well as ecosystem services precise information on LULC and LUCC are mandatory baseline datasets required over large areas Remote sensing can provide such information on different levels of detail and in a homogeneous and reliable way Hence LULC mapping can be regarded as a prototype for integrated approaches based on spaceborne and airborne remote sensing techniques combined with field observations The book provides for the first time a comprehensive view of various LULC activities focusing on European initiatives such as the LUCAS surveys the CORINE land covers the ESA EU GMES program and its resulting Fast Track and Downstream Services the EU JRC Global Land Cover the ESA GlobCover project as well as the ESA initiative on Essential Climate Variables All have and are producing highly appreciated land cover products The book will cover the operational approaches but also review current state of the art scientific methodologies and recommendations for this field It opens the view with best practice examples that lead to a view that exceeds pure mapping but to investigate into drivers and causes as well as future projections

Advances in Remote Sensing for Forest Monitoring Prem C. Pandey, Paul Arellano, 2022-10-07 Advances in Remote Sensing for Forest Monitoring An expert overview of remote sensing as applied to forests and other vegetation In Advances in Remote Sensing for Forest Monitoring a team of distinguished researchers delivers an expansive and insightful discussion of the latest research on remote sensing technologies as they relate to the monitoring of forests plantations and other vegetation The authors also explore the use of unmanned aerial vehicles and drones as well as multisource and multi sensor data such as optical SAR LIDAR and hyperspectral data The book

draws on the latest data and research to show how remote sensing solutions are being used in real world settings It offers contributions from researchers and practitioners from a wide variety of backgrounds and geographical regions to provide a diverse and global set of perspectives on the subject Readers will also find A thorough introduction to forest monitoring using remote sensing including recent advances in remote sensing technology Comprehensive explorations of sustainable forest management to enhance ecosystem services and livelihood security using a geospatial approach Case studies of monitoring the biochemical and biophysical parameters of forests including carotene and xanthophyll content Practical advice on how to apply machine learning tools to remote sensing data Perfect for postgraduates lecturers and researchers in the fields of environmental science forestry and natural resource management Advances in Remote Sensing for Forest Monitoring will also earn a place in the libraries of professionals and researchers working with remote sensing technology

Hyperspectral Remote Sensing Ruiliang Pu,2017-08-16 Advanced imaging spectral technology and hyperspectral analysis techniques for multiple applications are the key features of the book This book will present in one volume complete solutions from concepts fundamentals and methods of acquisition of hyperspectral data to analyses and applications of the data in a very coherent manner It will help readers to fully understand basic theories of HRS how to utilize various field spectrometers and bioinstruments the importance of radiometric correction and atmospheric correction the use of analysis tools and software and determine what to do with HRS technology and data
