Felker-Kantor, 2024-02-14 With its signature DARE to keep kids off drugs slogan and iconic t shirts DARE Drug Abuse Resistance Education was the most popular drug education program of the 1980s and 1990s But behind the cultural phenomenon is the story of how DARE and other antidrug education programs brought the War on Drugs into schools and ensured that the velvet glove of antidrug education would be backed by the iron fist of rigorous policing and harsh

sentencing Max Felker Kantor has assembled the first history of DARE which began in Los Angeles in 1983 as a joint venture between the police department and the unified school district By the mid 90s it was taught in 75 percent of school districts across the United States DARE received near universal praise from parents educators police officers and politicians and left an indelible stamp on many millennial memories But the program had more nefarious ends and Felker Kantor complicates simplistic narratives of the War on Drugs He shows how policing entered US schools and framed drug use as the result of personal responsibility moral failure and poor behavior deserving of punishment rather than something deeply rooted in state retrenchment the abandonment of social service provisions and structures of social and economic inequality Children and Families in Communities Jacqueline Barnes,Ilan Barry Katz,Jill E. Korbin,Margaret O'Brien,2006-05-01 In the past decade the relationship between communities children and families has inspired a wealth of research and policy initiatives because of a growing belief that the breakdown of families and communities is a significant factor in social problems including child abuse and juvenile crime The latest policy initiatives to tackle social problems have therefore targeted communities as well as high risk families This title amalgamates the latest research on the relationship between children families and communities and explores policy and practice implications Material for practitioners and community development workers is also be included The book is divided in to three parts 1 theory 2 the effect of community on children parents and families 3 interventions and policy implications *Research Methods in the Social and Health Sciences* Ted Palys,Chris Atchison,2021-02-03 *Research Methods in the Social and Health Sciences* Research Decisions by Ted Palys and Chris Atchison gives students a thorough thoughtful and highly readable introduction to the entire research process from start to finish From its underlying premise that your research questions and objectives rather than any specific method should guide your research this book discusses each step of the research process from limiting the scope of a literature review to navigating ethical considerations to deciding which methods are best suited for finding answers to specific research questions to how to analyze data and present findings Readers are encouraged to think deeply about each step of the research process The book promotes this deliberation by discussing the strengths and limitations of different methods and Throughout the process the authors provide many examples from their own and student research sharing insights for research decisions arising from that experience Readers will develop the skills to create solid research questions perform literature reviews identify appropriate data sources and methods conduct research analyze and interpret data and translate the resulting knowledge generated from the research process to a wider audience all core parts of the research process by developing their knowledge and creating confidence in their own decision making skills After explaining the unique and often complementary strengths of qualitative and quantitative methods students focus on what methods are best suited for finding answers to the research questions that interest them Major types of research including experiments case studies surveys quasi experiments ethnographies focus groups participatory action research and archival studies all receive significant coverage The text illustrates how these

methods are enhanced by integrating them with 21st century technologies and combining them in mixed methods projects Chapters on constructing a research proposal and disseminating research bookend the process with concrete steps in between to support students designing their own original research projects Study questions at the end of each chapter encourage students to think critically about the research process and how the choices a researcher makes will broaden or constrain what they can find By the end of the text social and health science students will feel confident in undertaking ethical and thoughtful research
