Ecker,Michael Kupferschmid,1991 Although this textbook is intended for use in a two semester sequence of courses introducing the mathematical methods of operations research Part I can also be used alone for a one semester course on linear programming The authors have chosen to provide deep and thorough coverage of the most important methods in operations research rather than a superficial treatment of a larger number of topics The level of exposition is appropriate for juniors and seniors who are majoring in engineering computer science mathematics and quantitative methods in management A solutions manual is available to qualified instructors Hydrosystems Engineering and Management Larry W. Mays,Yeou-Koung Tung,1992 This text is intended for a senior graduate level course in hydrosystems Students who take this course must have previously taken a course in hydrology and hydraulics The term Hydraulics can also be used to describe different types of water projects The scope of this text covers both of these definitions The major focus of the text is to bring together the use of mathematical modelling with the use of hydrosystems for the analysis design operation and management of water projects To accomplish this goal the authors present the basic principles of optimization probability and risk analysis and then apply these principles to the areas of water supply management and water excess management **Quantitative Methods for Management Decisions** William P.
