

## Algebra 2B - Activity 10.2

1. Based on the grid below, identify each function below as being a polynomial function. Explain.

2. Identify each of the functions below that are **not** polynomials. Explain these cases. There are three examples. How can you tell just by looking at the function's graph? **Hint:** Look at the behavior of graphs.

What is wrong? **Not smooth!** (What does that mean for the same function?)

3. Graph each of the functions part 2 on the grid below using the grid. Use the smoothness of each graph to show it is **not** a polynomial. If a function is not a polynomial, explain what is wrong.

**Warning:** The functions below that are not polynomials are **not** smooth. In some cases, you can see a sharp corner where a line changes slope abruptly, which shows it is **not** a polynomial.
