Towards HRI of Everyday Life Karolina Zawieska, Mohammad Obaid , Wafa Johal, Jessica Sorenson, Catharina Vesterager Smedegaard, Glenda Hannibal, 2025-10-03 Presently it is often assumed that at least in principle robots and social robots in particular have the potential to increase human well being across a wide range of sectors and application areas At the same time efforts to introduce such systems into our everyday environments have had only limited success and it is yet to be seen whether the impact of social robots on our daily lives professional and private will actually be beneficial Therefore there is a need to systematically address and study the long term use and presence of social robots in everyday environments where humans not only interact with robots but also have them integrated into the totality of their lived experiences in everyday life One of the main ways to investigate human engagement with social robots in everyday environments is through HRI studies conducted in the wild While such an approach has certainly been instrumental to and is increasingly used in HRI research we propose here to further expand the underlying theoretical and methodological frameworks to address the notion of everyday life The latter is viewed here as a useful concept and an umbrella term that allows us to address not only specific application domains for robots but also the continuity and totality of human lived experiences that emerge through long term engagement with social robots in everyday life contexts Placing social robots in everyday settings has often been an explicit goal for robot development however the

notion of everyday life has yet to be systematically analysed and addressed in this context Therefore this Research Topic aims to bring together a wide range of disciplinary and interdisciplinary contributions to further develop the HRI domain

Effects of Electromagnetic Radiation on Living Beings Felix A. Farret,2025-05-06 The objective of this book is to show in detail how electromagnetic waves existing in the environment can affect the electrochemical currents present in the brains and bodies of living beings that serve to communicate with their internal organs as well as with other living beings These electromagnetic waves are distributed intensively by current means of communication television cell phones radar medical equipment electrical machines electrical networks etc and by the stars in the Universe Such waves can affect in one way or another the electrochemical currents of living beings which seem to be currently interpreted as sensations hypnosis telepathy intuition spells mediumship visions and precognition as well as other less widespread forms such as telekinesis radiesthesia clairvoyance precognition and teleportation Several world famous examples of these possibilities are illustrated in the final chapter of this book Key Features 14 examples of diverse international case studies included Challenges conventional ways of thinking by exploring the intersection of electromagnetic waves and extrasensory perception Equips readers with insights into the various effects of electromagnetic waves in daily life which promotes awareness of their environment and its different influences and how they impact people Provides an engineering framework for understanding extrasensory beliefs and aims to explain the concept of historical brain believing in a better manner *Innovation and Experiential Learning in Academic Libraries* Sarah Nagle,Elias Tzoc,2022-03-15 As technology advances and the skills required for the future workforce continue to change rapidly academic libraries have begun to expand the definition of information literacy and the type of library services they provide to better prepare students for the constantly developing world they will face upon graduation More than teaching the newest technologies information literacy is expanding to help students develop enduring skills such as critical thinking creativity problem solving communication teamwork and more Innovation and Experiential Learning in Academic Libraries Meeting the Needs of 21st Century Students addresses the multitude of ways that academic librarians are collaborating with faculty and helping students develop these enduring skills by developing and integrating active and experiential learning approaches into teaching activities This book is divided into three sections The first section explores the role that library leaders play in supporting and advocating for innovation in information literacy and library services The second section features case studies from librarians who are implementing novel and multidisciplinary approaches to information literacy and innovative services such as maker scholarship digital humanities undergraduate research experiences and new active learning strategies These case studies also highlight how the COVID 19 pandemic has transformed teaching and learning in academic libraries The final section looks to the future providing guidance to information professionals on the issues and technologies that will drive transformations of information literacy in the coming years such as artificial intelligence and new information literacy applications As such library

administrators academic librarians information literacy practitioners and technologists will benefit from this book

Revealing Leslie John, 2026-02-24 A fascinating look into why people reveal what they do about themselves and how we can all communicate better with others Arthur C Brooks bestselling author of *From Strength to Strength* A groundbreaking book on the surprising potential of revealing more of ourselves to others from a celebrated Harvard Business School professor and expert on the psychology of personal disclosure decisions We all know the feeling that gut wrenching post conversation replay cringing at how much we just revealed We live in fear of saying too much so we keep our mouths shut guard our emotions and lock away our most personal thoughts But what if we've been worrying about the wrong thing A growing body of research shows we vastly underestimate the value of sharing more than we think we should with our spouses friends colleagues and even strangers Drawing on over a decade of research and real life stories behavioral scientist Leslie John explores why we hesitate to open up when sharing really does backfire and how to strike a balance between too much and too little Learning to be more vulnerable and open at work and at home can unlock some of life's richest rewards deeper friendships stronger professional relationships greater well being and yes even love *Revealing* is a road map for making smarter bolder and ultimately more satisfying decisions about just how much you want to share and why

Psychology in Everyday Life David G. Myers, 2011-02-18 Creating an exceptionally student friendly textbook in psychology isn't just about making the chapters shorter and pages more colorful It's about using that type of format to provide a clear portrait of psychological science concise but not oversimplified all while continually answering the recurring student question What does this have to do with me David Myers brief introduction to psychology *Psychology in Everyday Life* certainly does offer brief easily manageable chapters and a colorful image rich design both shaped by extensive research class testing and instructor student feedback But what makes it such an exceptional text is what flows through those chapters rich presentations of psychology's core concepts and field defining research examined in context of the everyday lives of all kinds of people around the world and communicated in the captivating storyteller's voice that is instantly recognizable as Myers The new edition of *Psychology in Everyday Life* offers an extraordinary amount of new research effective new inquiry based study tools and further design innovations all while maintaining its trademark brevity and clean layout And it is accompanied by an innovative media supplements of the same scope as all of David Myers more comprehensive textbooks
