**Case Studies and Theory Development in the Social Sciences** Alexander L. George, Andrew Bennett, 2005-04-15 The use of case studies to build and test theories in political science and the other social sciences has increased in recent years Many scholars have

argued that the social sciences rely too heavily on quantitative research and formal models and have attempted to develop and refine rigorous methods for using case studies This text presents a comprehensive analysis of research methods using case studies and examines the place of case studies in social science methodology It argues that case studies statistical methods and formal models are complementary rather than competitive The book explains how to design case study research that will produce results useful to policymakers and emphasizes the importance of developing policy relevant theories It offers three major contributions to case study methodology an emphasis on the importance of within case analysis a detailed discussion of process tracing and development of the concept of typological theories Case Studies and Theory Development in the Social Sciences will be particularly useful to graduate students and scholars in social science methodology and the philosophy of science as well as to those designing new research projects and will contribute greatly to the broader debate about scientific methods

The Case for Case Studies Jennifer Widner, Michael Woolcock, Daniel Ortega Nieto, 2022-05-26 This book seeks to narrow two gaps first between the widespread use of case studies and their frequently loose methodological moorings and second between the scholarly community advancing methodological frontiers in case study research and the users of case studies in development policy and practice It draws on the contributors' collective experience at this nexus but the underlying issues are more broadly relevant to case study researchers and practitioners in all fields How does one prepare a rigorous case study When can causal inferences reasonably be drawn from a single case When and how can policy makers reasonably presume that a demonstrably successful intervention in one context might generate similarly impressive outcomes elsewhere or if massively scaled up No matter their different starting points disciplinary base epistemological orientation sectoral specialization or practical concerns readers will find issues of

significance for their own field and others across the social sciences This title is also available Open Access
