Neurocomic:

Neurocomic Hana Ros,2022-09-20 Do you know what your brain is made of How does memory function What is a neuron and how does it work For that matter what s a comic And in the words of Lewis Carroll s famous caterpillar Who are you Neurocomic is a journey through the human brain a place of neuron forests memory caves and castles of deception Along the way you ll encounter Boschean beasts giant squid guitar playing sea slugs and the great pioneers of neuroscience Hana Ro and Matteo Farinella provide an insight into the most complex thing in the universe *Elusive Brain* Jason

Tougaw,2018-04-24 Featuring a foreword by renowned neuroscientist Joseph E LeDoux The Elusive Brain is an illuminating comprehensive survey of contemporary literature s engagement with neuroscience This fascinating book explores how literature interacts with neuroscience to provide a better understanding of the brain s relationship to the self Jason Tougaw surveys the work of contemporary writers including Oliver Sacks Temple Grandin Richard Powers Siri Hustvedt and Tito Rajarshi Mukhopadhyay analyzing the way they experiment with literary forms to frame new views of the immaterial experiences that compose a self He argues that their work offers a necessary counterbalance to a wider cultural neuromania that seeks out purely neural explanations for human behaviors as varied as reading economics empathy and racism Building on recent scholarship Tougaw s evenhanded account will be an original contribution to the growing field of neuroscience and literature *Life, Re-Scaled* Liliane Campos,Pierre-Louis Patoine,2022-10-11 This edited volume explores new engagements with the life sciences in contemporary fiction poetry comics and performance The gathered case studies investigate how recent creative work reframes the human within microscopic or macroscopic scales from cellular biology to systems ecology and engages with the ethical philosophical and political issues raised by the twenty first century s shifting views of life The collection thus examines literature and performance as spaces that shape our contemporary biological imagination

Comprised of thirteen chapters by an international group of academics *Life Re Scaled The Biological Imagination in Twenty First Century Literature and Performance* engages with four main areas of biological study Invisible scales cells microbes and mycelium Neuro medical imaging and diagnosis Pandemic imaginaries and Ecological scales The authors examine these concepts in emerging forms such as plant theatre climate change art ecofiction and pandemic fiction including the work of Jeff Vandermeer Jon McGregor Jeff Lemire and Extinction Rebellion s Red Rebel Brigade performances This valuable resource moves beyond the biological paradigms that were central to the nineteenth and twentieth centuries to outline the specificity of a contemporary imagination *Life Re Scaled* is crucial reading for academics scholars and authors alike as it proposes an unprecedented overview of the relationship between literature performance and the life sciences in the twenty first century

Neurocomic Matteo Farinella,Hana Roš,2014-09 The Senses Matteo Farinella,2017-11-28 Step into the world of the senses Meet the four mechanoreceptors of touch examine our taste buds up close discover the link between smells and

memories and learn how optical illusions trick the cells in our eyes into seeing things that aren't there. In this humorous, detailed yet still accessible book, neuroscientist and illustrator Matteo Farinella takes the reader on a wild ride through key figures and fascinating facts about each of our five senses, describing the most up-to-date research alongside illuminating drawings and diagrams that even the most scientifically unsavvy will enjoy.
