Tian-You,1999-08-10 Different applications fields would benefit from automation if suitable control strategies and devices without modifications of the whole system or the productive process were to be introduced This aim should be achieved by a low cost automation approach The objective of this Symposium was to bring together end users and control systems specialists to evaluate the possibilities of techniques design procedures components and instruments to achieve a low cost automation It also takes into consideration not only all the economic aspects but also the improvements in productivity reliability flexibility and facility of implementation *Chilton's I & C S* ,1991 *DE Technology* ,1986 Control Engineering ,1990 Instrumentation and automatic control systems **Programmable Logic Controllers** John W. Canales-Ruiz,1996 Paperback These proceedings contain the papers presented at the IFAC Symposium on Control of Power Plants and Power Systems SIPOWER 95 held in Cancun Mexico on 6 8 December 1995 The aim of the symposium was to lessen the gap between academic groups and industry by using the obvious interaction between power plants and power networks and the tools common to both to foster communication and encourage a more synergetic relationship The symposium was divided equally between power plants and power systems and 104 papers were presented representing all five continents and reflecting the international nature of the meeting The technical sessions were organized following two main criteria the technology used and the object being studied Many papers fell into both categories and various topics were covered but artificial intelligence was by far the most pervasive There were also two plenary sessions on Control Centers and on Power Plant **IAS '96** IEEE Industry Applications Society.
