CAD Based Programming for Sensory Robots Bahram Ravani, 1988-12-08 This book contains 26 papers presented at the NATO Advanced Research Workshop on CAD Based Programming for Sensory Robots held in IL CIOCCA Italy July 4 6 1988 CAD based robot programming is considered to be the process where CAD Computer Based models are used to develop robot programs If the program is generated at least partially by a programmer interacting for example with a computer graph i c d sp i 1 ay of the robot and its workce 11 env ironment the process is referred to as graphical off line programming On the other hand if the robot program is generated

automatically for example by a computer then the process is referred to as automatic robot programming The key element here is the use of CAD models both for interactive and automatic generation of robot programs CAD based programming therefore brings together computer based modeling and robot programming and as such cuts across several disciplines including geometric modeling robot programming kinematic and dynamic modeling artificial intelligence sensory monitoring and so on

Off-line Programming of Industrial Robots Alfred Storr, J. F. McWaters, 1987 Industrial robots are now being more readily included into highly integrated expensive manufacturing systems The development of off line teaching methods has thus become increasingly important if costly on line programming time is to be avoided This combined with the fact that the programming aspect now forms one of the major bottlenecks delaying the expansion of robot applications makes this book most timely in its attempt to offer solutions to the problem The comparison of methods and experiments contained in this volume will be of help in establishing guidelines for future industrial use of robots Programming strategies are examined as are assembly applications simulation programming aids and programming for a CIM environment A number of examples are included illustrating the current state of off line techniques *Chartered Mechanical Engineer*, 1987
