**Music Theory for Computer Musicians** Michael Hewitt, 2008 Many DJs gigging musicians and electronic music producers understand how to play their instruments or make music on the computer but they lack the basic knowledge of music theory needed to take their music making to the next level and compose truly professional tracks Beneath all the enormously different styles of modern electronic music lie certain fundamentals of the musical language that are exactly the same no matter what kind of music you write It is very important to acquire an understanding of these fundamentals if you are to develop as a musician and music producer Put simply you need to know what you are doing with regard to the music that you are writing *Music Theory for Computer Musicians* explains these music theory fundamentals in the most simple and accessible way possible Concepts are taught using the MIDI keyboard environment and today's computer composing and recording software By reading this book and following the exercises contained within it you the aspiring music producer computer musician will find yourself making great progress toward understanding and using these fundamentals of the music language The result will be a great improvement in your ability to write and produce your own original music [Learning Music Theory with Logic, Max, and Finale](#) Geoffrey Kidde, 2020-02-20 *Learning Music Theory with Logic Max and Finale* is a groundbreaking resource that bridges the gap between music theory teaching and the world of music software programs Focusing on three key programs the Digital Audio Workstation DAW Logic the Audio Programming Language APL Max and the music printing program Finale this book shows how they can be used together to learn music theory It provides an introduction to core music theory concepts and shows how to develop programming skills alongside music theory skills Software tools form an essential part of the modern musical environment laptop musicians today can harness incredibly powerful tools to create record and manipulate sounds Yet these programs on their own don't provide musicians with an understanding of music notation and structures while traditional music theory teaching doesn't fully engage with technological capabilities With clear and practical applications this book demonstrates how to use DAWs APLs and music printing programs to create interactive resources for learning the mechanics behind how music works Offering an innovative approach to the learning and teaching of music theory in the context of diverse musical genres this volume provides game changing ideas for educators practicing musicians and students of music The author's website at <http://www.geoffreykidde.com> includes downloadable apps that support this book [Teaching Music Through Composition](#) Barbara Freedman, 2013-04-11 *Teaching Music through Composition* offers a practical fully multimedia curriculum designed to teach basic musical concepts through the creative process of music composition Author and award winning music educator Barbara Freedman presents classroom tested ways of teaching composition with technology as a tool with which students can create edit save and reproduce music As Freedman demonstrates technology allows a musical experience for all skill levels in opportunities never before available to compose manipulate instantly listen to music electronically and even print

standard Western music notation for others to play without having to know much about traditional music theory or notation. All students can have meaningful hands on applied learning experiences that will impact not only their music experience and learning but also their understanding and comfort with 21st century technology. Whether the primary focus of your class is to use technology to create music or to explore using technology in a unit or two this book will show you how it can be done with practical tried and true lesson plans and student activities.

**Music Education on the Verge** Judy Lewis, Andrea Maas, 2022-08-08 In March 2020 the COVID 19 pandemic swept the world causing physical emotional economic and social upheaval in every part of the globe. It also catalyzed a renewed interrogation by music education faculty in higher education of philosophies and practices that had long gone unexamined. *Music Education on the Verge: Stories of Pandemic Teaching and Transformative Change* is a collection of narratives by music teacher educators describing how they responded to the disruption of the COVID 19 pandemic with and for their students. Through these stories the authors step back and reflect on the events, challenges, triumphs and innovations discovered as they prepared the next generation of music educators in this time of crisis. They tell stories of reexamining old frameworks, discovering new affordances of technologies, humanizing pedagogy, deepening culturally responsive and sustaining experiences and creating space for democratic practices. Each chapter offers examples of innovative music pedagogy that can be adapted and applied by music educators and music teacher educators with their students. Collectively they paint a picture of possibilities challenging music teacher educators and educators in all fields to seek out openings and pursue pedagogies of change as we move forward into a post pandemic world.

**Microtonality in Ancient Greek Music** Dr Michael Hewitt, 2014-11-30 This book represents a study of the fascinating subject of the musical scales and modes of ancient Greek music. Although it is well known that the West inherited its musical scales from ancient Greece via the church, less well known perhaps is the fact that ancient Greek musicians enjoyed the use of a much wider spectrum of scales and modes, many of which used microtones. Included is a study of these scales and modes together with the information required for those musicians and composers who may wish to try these scales out in their own music productions. Utilizing the fine tuning capabilities of modern music software, this represents an intriguing and ever growing area of musical research and development which should interest every open minded musician.
