Database Modeling for Industrial Data Management: Emerging Technologies and Applications Ma, Zongmin,2005-12-31

This book covers industrial databases and applications and offers generic database modeling techniques Provided by

publisher **Three-Dimensional Model Analysis and Processing** Faxin Yu,Zheming Lu,Hao Luo,Pinghui

Wang,2011-02-03 With the increasing popularization of the Internet together with the rapid development of 3D scanning

technologies and modeling tools 3D model databases have become more and more common in fields such as biology

chemistry archaeology and geography People can distribute their own 3D works over the Internet search and download 3D

model data and also carry out electronic trade over the Internet However some serious issues are related to this as follows 1

How to efficiently transmit and store huge 3D model data with limited bandwidth and storage capacity 2 How to prevent 3D

works from being pirated and tampered with 3 How to search for the desired 3D models in huge multimedia databases This

book is devoted to partially solving the above issues Compression is useful because it helps reduce the consumption of

expensive resources such as hard disk space and transmission bandwidth On the downside compressed data must be

decompressed to be used and this extra processing may be detrimental to some applications 3D polygonal mesh with

geometry color normal vector and texture coordinate information as a common surface representation is now heavily used in

various multimedia applications such as computer games animations and simulation applications To maintain a convincing

level of realism many applications require highly detailed mesh models However such complex models demand broad

network bandwidth and much storage capacity to transmit and store To address these problems 3D mesh compression is

essential for reducing the size of 3D model representation **ICT Innovations 2009** Danco Davcev,Jorge Marx

Gómez,2010-01-06 This book is the result of the first International Conference ICT Innovations 2009 The ICT Innovations

conference is the primary scientific action of the Macedonian Society on Information and Communication Technologies ICT

ACT It promotes the publication of scientific results of the international community related to innovative fundamental and

applied research in ICT Today ICT has enlarged its horizons and it is practiced under multidisciplinary contexts that

introduce new challenges to theoretical and technical approaches The ICT Innovations 2009 conference gathered academics

professionals and practitioners reporting their valuable experiences in developing solutions and systems in the industrial and

business arena especially innovative commercial implementations novel applications of technology and experience in

applying recent research advances to practical situations in any ICT areas The conference focuses on issues concerning a

variety of ICT fields like Multimedia Information Systems Artificial Intelligence Pervasive and Ubiquitous Computing Eco and

Bio Informatics Internet and Web Applications and Services Wireless and Mobile Communications and Services Computer

Networks Security and Cryptography Distributed Systems GRID and Cloud Computing ICT Innovations 2009 Conference was

held in Ohrid Macedonia in September 28 30 2009 Local arrangements provided by the members of the Macedonian Society

ACM CIKM*, 2002 **3D Object Processing** Jean-Luc Dugelay, Atilla Baskurt, Mohamed Daoudi, 2008-06-03 The arrival and continuing evolution of high quality 3D objects has been made possible by recent progress in 3D scanner acquisition and 3D graphics rendering With this increasing quality comes a corresponding increase in the size and complexity of the data files and the necessity for advances in compression techniques Effective indexing to facilitate the retrieval of the 3D data is then required to efficiently store search and recapture the objects that have been compressed The application of 3D images in fields such as communications medicine and the military also calls for copyright protection or watermarking to secure the data for transmission Written by expert contributors this timely text brings together the three important and complementary topics of compression retrieval and watermarking techniques for 3D objects 3D object processing applications are developing rapidly and this book tackles the challenges and opportunities presented focusing on the secure transmission sharing and searching of 3D objects on networks and includes an introduction to the commonly used 3D representation schemes the characteristics advantages and limitations of polygonal meshes surface based models and volumetric models 3D compression techniques the 3D coding and decoding schemes for reducing the size of 3D data to reduce transmission time and minimize distortion state
