Michael Wuthrich,2015-07-28 What determines voting behavior in Turkey At a time when the center right religious conservative leadership of the Justice and Development Party has dominated government and the political scene in Turkey so much so that the democratic credentials of the regime have come into question many have sought to understand what undergirds this party s success at the polls While many scholars have argued that elections in Turkey over time can be effectively and simply explained by static social or cultural cleavages Wuthrich challenges these assertions with a framework that carefully attends to patterns of strategic vote getting behavior in elections by political parties and their leaders Using the campaign speeches of the political elite election data at national and provincial levels and careful observations of voter mobilization strategies across time Wuthrich traces four distinct patterns that explain important shifts in electoral behavior He covers the first free and fair multiparty election in 1950 and follows campaign strategies through 2011 highlighting and explaining the potential development of a new and more problematic paradigm emerging in the post 2007 environment

**Structural Change in Turkish Society** Mübeccel Belik Kıray,1991 **Contesting Cosmopolitan Europe** James Foley,Umut Korkut,2025-10-01 The project of European integration has undergone a succession of shocks beginning with the Eurozone crisis followed by reactions to the sudden growth of irregular migration and most recently the coronavirus

pandemic These shocks have politicised questions related to the governance of borders and markets that for decades had been beyond the realm of contestation For some time these questions have been spilling over into domestic and European electoral politics with the rise of populist and Eurosceptic parties Increasingly however the crises have begun to reshape the liberal narratives that have been central to the European project This book charts the rise of contestation over the meaning of Europe particularly in light of the coronavirus crisis and Brexit Drawing together cutting edge interdisciplinary scholarship from across the continent it questions not merely the traditional conflict between European and nationalist politics but the impact of contestation on the assumed cosmopolitan values of Europe
