Strategic Foresight Sarah Lai-Yin Cheah, 2020-03-09

Strategic foresight is a discipline that organizations adopt to gather, interpret, manage, and disseminate information about the future environment they plan to operate in. This book introduces the concept of strategic foresight and advocates a holistic and systemic foresight approach comprising five phases that are suitable for organizations in the public and private sectors. Using real-life cases as practical examples, the book demonstrates how organizations can apply a range of foresight methods and resources across the phases from intelligence to implementation. The book offers an opportunity to learn by all key stakeholders. It enhances the understanding of the National Research Organization's Foresight exercise as the complex social phenomenon in its context. The case study of the National Research Organisation provides lessons and insights that can improve both the theoretical and practical implementation of the Foresight Exercise.

Dr Mlungisi Cele, Acting Head, National Advisory Council on Innovation, Department of Science and Technology, Republic of South Africa

Foresight methodologies have been widely spreading among business and research organizations worldwide during the last decades. The weakest point of many forward-looking activities so far was the lack of their practical use. The book shows on a number of cases how a Foresight study, being wisely designed and implemented, can become a useful navigation tool for increasing competitiveness in the fast-changing environment.

Dr Alexander Sokolov, Professor, HSE National Research University, Russia; Director, Institute for Statistical Studies and Economics of Knowledge, International Research and Educational Foresight Centre

Very useful tool to describe how organizations assess the future and formulate strategic plans using a systemic foresight methodology.

Ibon Zugasti, Managing Director in PROSPEKTIKER and Chair of the Millennium Project Node in Spain

A comprehensive source of knowledge on complex issues of technology foresight process from conception to commercialization of key technologies, made easy to understand and useful for aspiring futurists seeking to learn more about the matters at hand.

Dr Surachai Sathitkunnarat, Executive Director, APEC Center for Technology Foresight, APEC CTF Assistant to the President Office of National Higher Education Science Research and Innovation Policy Council, NXPO Thailand

This book provides a very good coverage of the end-to-end methodology for technology-based innovation through the use of diverse and relevant business use cases. Very often, books on this theme only expound the approaches. Sarah goes beyond in sharing the pitfalls and challenges during the different stages of the systemic foresight methodology so that readers can learn and avoid the mistakes that other companies made. The emphasis on open innovation and intellectual property management is valuable as many organizations fail to deliver the vision due to insufficient attention on these two aspects. A must-read if you wish to master strategic foresight.

Dr Terence Hung, Chief Future Intelligence Technologies, Rolls Royce Singapore Pte Ltd

Why do people want to know the future? People want to use

budget efficiently or don't want to waste time. Aside from those who see the future like fortune tellers, how do we make the future? Foresight is known as a method of creating the future in a way that many people have been using. So how is it different between Forecast and Foresight? This book will help answer that. Dr. Kuniko Urashima, Deputy Director of Foresight Center, National Institute of Science and Technology Policy (NISTEP), Japan.

China's Long March of Modernisation Khor Eng Lee, Aaron Khor, 2019-12-11. With the support of its strong leadership and industrious population of close to one billion working Chinese, fully committed and dedicated to its peaceful development and comprehensive modernization, China is forging ahead on the driver's seat in various fields of human endeavour. A leading global role is resourceful and resurgent New China's manifest destiny with the confidence of attaining and regaining the world's largest economy within the coming decade. Holding high the new banner of the Fourth Industrial Revolution (IR 4.0), China will continue steadfastly and strongly on its Long March of Modernization. In the military field, the People's Liberation Army (PLA) has developed from a ragtag fighting force of some 20,000 troops into a two-million-strong military that is presently rated as the world's third strongest after its counterparts in the US and Russia. Speaking at a grand rally to mark the 90th anniversary of the People's Liberation Army (PLA) at the Great Hall of the People in Beijing on 1 August 2017, President Xi Jinping said the PLA has transformed itself from a millet plus rifles single-service force to one that has fully fledged services. Having basically completed its mechanization, the PLA is moving rapidly toward having strong informationized armed forces. 12 President Xi stressed that China must step up the PLA's transformation into a world-class military that is ready to fight and win wars in defence of its national sovereignty. 13 To quote from the May 2017 Report by the US Department of Defense: The PLA is pursuing an ambitious modernization program that aligns with China's two centenary goals. DIA Defense Intelligence Agency director Lieutenant General Robert Ashley emphasized that China Military Power 2019, published and released by the DIA on 15 January 2019, showed China's evolution from a domestically oriented force to a global one. He told reporters the PLA was changing from a defensive, inflexible ground-based force charged with domestic and peripheral security responsibilities to a joint, highly agile, expeditionary and power-projecting arm of Chinese foreign policy that engages in military diplomacy and operations across the globe. Gabriel Black reported on 30 January 2019 on the World Socialist Web Site. 14 According to President Xi, the PLA's military mechanization will basically be achieved with advanced IT application and much enhanced strategic capabilities by 2020, on the eve of the CPC's centenary on 1 July 2021. The people's armed forces will be transformed into a world-class military by mid-21st century to mark the centenary of the founding of New China, the People's Republic of China (the PRC) on 1 October 2049. In his 56-page statement to the Senate Armed Services Committee on 15 March 2018, Adm. Harry B. Harris Jr., then naval head of US Pacific Command (USPACOM), wrote that on the current trajectory, the PLA will likely attain its goals of completing military modernisation by 2033 and achieving world-class status by 2049, well ahead of the projected completion dates. With the companion volume CHINA'S RENAISSANCE, the following narrative adumbrates the saga of CHINA'S LONG
