   Least-Mean-Square Adaptive Filters Simon Haykin,Bernard Widrow,2003-09-08 Edited by the original inventor of the technology Includes contributions by the foremost experts in the field The only book to cover these topics together

   Adaptive Filtering Primer with MATLAB Alexander D. Poularikas,Zayed M. Ramadan,2006-02-14 Because of the wide use of adaptive filtering in digital signal processing and because most of the modern electronic devices include some type of an adaptive filter a text that brings forth the fundamentals of this field was necessary The material and the principles presented in this book are easily accessible to engineers scientists and students who would like to learn the fundamentals of this field and have a background at the bachelor level Adaptive Filtering Primer with MATLAB clearly explains the fundamentals of adaptive filtering supported by numerous examples and computer simulations The authors introduce discrete time signal processing random variables and stochastic processes the Wiener filter properties of the error surface the steepest descent method and the least mean square LMS algorithm They also supply many MATLAB functions and m files along with computer experiments to illustrate how to apply the concepts to real world problems The book includes problems along with hints suggestions and solutions for solving them An appendix on matrix computations completes the self contained coverage With applications across a wide range of areas including radar communications control medical instrumentation and seismology Adaptive Filtering Primer with MATLAB is an ideal companion for quick reference and a perfect concise introduction to the field   Advances in Systems, Computing Sciences and Software Engineering Tarek Sobh,Khaled Elleithy,2007-09-27 Advances in Systems Computing Sciences and Software Engineering This book includes the proceedings of the International Conference on Systems Computing Sciences and Software Engineering SCSS 05 The proceedings are a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of computer science software engineering computer engineering systems sciences and engineering information technology parallel and distributed computing and web based programming SCSS 05 was part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering CISSE 05 www cisse2005 org the World s first Engineering Computing and Systems Research E Conference CISSE 05 was the first high caliber Research Conference in the world to be completely conducted online in real time via the internet CISSE 05 received 255 research paper submissions and the final program included 140 accepted papers from more than 45 countries The concept and format of CISSE 05 were very exciting and ground breaking The PowerPoint presentations final paper manuscripts and time schedule for live presentations over the web had been available for 3 weeks prior to the start of the conference for all registrants so they could choose the presentations they want to attend and think about questions that they might want to ask The live audio presentations were also recorded and were part of the permanent CISSE archive which also included all power point presentations and papers SCSS 05 provided a virtual forum for presentation and discussion of the state of the art research on Systems Computing

Sciences and Software Engineering *Sensitivity Analysis for Neural Networks* Daniel S. Yeung,Ian Cloete,Daming Shi,Wing W. Y. Ng,2009-11-09 Artificial neural networks are used to model systems that receive inputs and produce outputs The relationships between the inputs and outputs and the representation parameters are critical issues in the design of related engineering systems and sensitivity analysis concerns methods for analyzing these relationships Perturbations of neural networks are caused by machine imprecision and they can be simulated by embedding disturbances in the original inputs or connection weights allowing us to study the characteristics of a function under small perturbations of its parameters This is the first book to present a systematic description of sensitivity analysis methods for artificial neural networks It covers sensitivity analysis of multilayer perceptron neural networks and radial basis function neural networks two widely used models in the machine learning field The authors examine the applications of such analysis in tasks such as feature selection sample reduction and network optimization The book will be useful for engineers applying neural network sensitivity analysis to solve practical problems and for researchers interested in foundational problems in neural networks
