**Implementing a crowd-sourced picture archive for Bad Harzburg** Rieke Freund, Jan Philip Rättsch, Franziska Hradilak, Benedikt Vidic, Oliver Heß, Nils Lißner, Hendrik Wölert, Jens Lincke, Tom Beckmann, Robert Hirschfeld, 2023-06-06 Pictures are a medium that helps make the past tangible and preserve memories Without context they are not able to do so Pictures are brought to life by their associated stories However the older pictures become the fewer contemporary witnesses can tell these stories Especially for large analog picture archives knowledge and memories are spread over many people This creates several challenges First the pictures must be digitized to save them from decaying and make them available to the public Since a simple listing of all the pictures is confusing the pictures should be structured accessibly Second known information that makes the stories vivid needs to be added to the pictures Users should get the opportunity to contribute their knowledge and memories To make this

usable for all interested parties even for older less technophile generations the interface should be intuitive and error tolerant The resulting requirements are not covered in their entirety by any existing software solution without losing the intuitive interface or the scalability of the system Therefore we have developed our digital picture archive within the scope of a bachelor project in cooperation with the Bad Harzburg Stiftung For the implementation of this web application we use the UI framework React in the frontend which communicates via a GraphQL interface with the Content Management System Strapi in the backend The use of this system enables our project partner to create an efficient process from scanning analog pictures to presenting them to visitors in an organized and annotated way To customize the solution for both picture delivery and information contribution for our target group we designed prototypes and evaluated them with people from Bad Harzburg This helped us gain valuable insights into our system s usability and future challenges as well as requirements Our web application is already being used daily by our project partner During the project we still came up with numerous ideas for additional features to further support the exchange of knowledge

### Book Description

React, one of the most widely used JavaScript frameworks, allows developers to build fast and scalable front end applications for any use case. GraphQL is the modern way of querying an API. It represents an alternative to REST and is the next evolution in web development. Combining these two revolutionary technologies will give you a future proof and scalable stack you can start building your business around. This book will guide you in implementing applications by using React, Apollo, Node.js and SQL. We will focus on solving complex problems with GraphQL such as abstracting multi table database architectures and handling image uploads. Our client and server will be powered by Apollo. Finally we will go ahead and build a complete GraphQL app. While building the app we will cover the tricky parts of connecting React to the back end and maintaining and synchronizing state. We will learn all about querying data and authenticating users.

We'll write test cases to verify the front end and back end functionality for our application and cover deployment. By the end of the book you will be proficient in using GraphQL and React for your full stack development requirements. What you will learn: Resolve data from multi table database and system architectures. Build a GraphQL API by implementing models and schemas with Apollo and Sequelize. Set up an Apollo Client and build front end components using React. Use Mocha to test your full stack application. Write complex React components and share data across them. Deploy your application using Docker.

Who this book is for: The book is for web developers who want to enhance their skills and build complete full stack applications using industry standards. Familiarity with JavaScript, React, and GraphQL is expected to get the most from this book.
