Product Innovation Management Stefano Biazzo, Roberto Filippini, 2021-07-02 This book offers new insights into the complex set of activities and decisions of product innovation management. It provides concepts, methods, and tools that can help accelerate the introduction of successful products to the market in an increasingly competitive and changing business landscape. It also offers examples and case studies and is the result of more than 20 years of study, research, and consulting carried out by the two authors in the field of innovation management. The book discusses the demanding challenges of product innovation and offers practitioners guidance on how to respond to these challenges. It presents a three-level framework: the innovation pyramid, which reflects the core components of a firm's innovation capability; first intelligence, absorbing information and knowledge from the outside world by looking beyond the familiar territories of the current market, technology, and customers; second discovery, exploring opportunities for innovation through creative ideation and technology experimentation; and third development, transforming opportunities into profitable new products and services. Information Systems and e-Business Technologies Roland Kaschek, Christian Kop, Claudia Steinberger, Günther Fliedl, 2008-04-19 This book constitutes the refereed proceedings of UNISCON 2008, held in Klagenfurt, Austria, during April 22-25, 2008. UNISCON combines the ECOMO workshop series and the ISTA conference series. The 19 papers dealing with conceptual modeling, model-driven software development, and information systems applications represent a 30% selection from the original set of submissions. They are completed by two keynote lectures and 35 papers from internationally renowned researchers invited in honor of Heinrich C. Mayr, whose 60th birthday is also celebrated at this event that he originally created. **Proceedings of the 23rd International Symposium on Advancement of Construction Management and Real Estate** Fenjie Long, Sheng Zheng, Yuzhe Wu, Gangying Yang, Yan Yang, 2021-02-02 This book presents the proceedings of CRIOCM2018, 23rd International Symposium on Advancement of Construction Management and Real Estate, sharing the latest developments in real estate and construction management around the globe. The conference was organized by the Chinese Research Institute of Construction Management (CRIOCM), working in close collaboration with Guizhou Institute of Technology (GIT). Written by international academics and professionals, the proceedings discuss the latest achievements, research findings, and advances in frontier disciplines in the field of construction management and real estate. Covering a wide range of topics, including New-type urbanization, land development and land use, urban planning and infrastructure construction, housing market and housing policy, real estate finance and investment, new theories and practices on construction project management, smart city, BIM technologies and applications, construction management in the big data era, green architecture and eco-city, rural rejuvenation and eco-civilization, and other topics related to construction management and real estate, the discussions provide valuable insights into the advancement of construction management and real estate in the new era.
