### **Ambient Intelligence- Software and Applications - 8th International Symposium on Ambient Intelligence**

**(ISAmI 2017)** Juan F. De Paz, Vicente Julián, Gabriel Villarrubia, Goretí Marreiros, Paulo Novais, 2017-06-14 Ambient Intelligence AmI is a recent paradigm emerging from Artificial Intelligence in which computers are used as proactive tools to assist people with their day to day activities making their lives more comfortable Another main goal of AmI originates from the human computer interaction domain and focuses on offering ways to interact with systems in a more natural way by means of user friendly interfaces This field is evolving quickly as can be witnessed by the emerging natural language based and gesture based types of interaction The inclusion of computational power and communication technologies in everyday objects is growing and their embeddedness in our environments should be as invisible as possible In order for AmI to be successful human interaction with computing power and embedded systems in the surroundings should be smooth and take place without people actually noticing it The only things people should notice in connection with AmI are more safety comfort and wellbeing emerging in a natural and inherent way ISAmI is the International Symposium on Ambient Intelligence and aims to bring together researchers from the various disciplines that constitute the scientific field of Ambient Intelligence to present and discuss the latest results new ideas projects and lessons learned especially in terms of software and applications

**Edge-of-Things in Personalized Healthcare Support Systems** Rajeswari Sridhar, G. R. Gangadharan, Michael Sheng, Rajan Shankaran, 2022-06-19 Edge of Things in Personalized Healthcare Support Systems discusses and explores state of the art technology developments in storage and sharing of personal healthcare records in a secure manner that is globally distributed to incorporate best healthcare practices The book presents research into the identification of specialization and expertise among healthcare professionals the sharing of records over the cloud access controls and rights of shared documents document privacy as well as edge computing techniques which help to identify causes and develop treatments for human disease The book aims to advance personal healthcare medical diagnosis and treatment by applying IoT cloud and edge computing technologies in association with effective data analytics Provides an in depth analysis of how to model and design applications for state of the art healthcare systems Discusses and explores the social impact of the intertwined use of emerging IT technologies for healthcare Covers system design and software building principles for healthcare using IoT cloud and edge computing technologies with the support of effective and efficient data analytics strategies Explores the latest algorithms using machine and deep learning in the areas of cloud edge computing IoT and healthcare analytics

**Nature Inspired Optimisation for Delivery Problems** Neil Urquhart, 2022-05-14 This book explains classic routing and transportation problems and solutions before offering insights based on successful real world solutions The chapters in Part I introduce and explain the traveling salesperson problem TSP vehicle routing problems VRPs and multi objective problems with an emphasis on heuristic approaches and software engineering aspects In turn Part II demonstrates how to

exploit geospatial data routing algorithms and visualization In Part III the above techniques and insights are combined in real world success stories from domains such as food delivery in rural areas postal delivery workforce routing and urban logistics The book offers a valuable supporting text for advanced undergraduate and graduate courses and projects in Computer Science Engineering Operations Research and Mathematics It is accompanied by a repository of source code allowing readers to try out the algorithms and techniques discussed

**Modern Web Cartography** Patrick Marie,2026-02-17

Modern Web Cartography is your ultimate guide to practical web maps using open source tools with a particular focus on OpenStreetMap OSM and its rich ecosystem In an era where maps are embedded in virtually every digital service from navigation apps to data dashboards understanding how to build and customize them is more valuable than ever While proprietary solutions like Google Maps dominate the market open source alternatives offer greater flexibility transparency and control over data OSM is at the forefront of this movement supported by a growing community and a variety of powerful tools such as Overpass for data extraction Nominatim for geocoding Leaflet for browser based map rendering and Folium for map creation in Python This book is structured to build knowledge progressively Early chapters introduce OSM and its data model then move on to APIs and tools for querying and retrieving map data Readers learn to create maps both in the browser using JavaScript and Leaflet and on the server using Python and Folium Advanced sections demonstrate how to integrate multiple tools combining Overpass data queries Nominatim geocoding and OSRM routing into cohesive web applications Numerous and varied examples anchor theoretical concepts in real world applications As more organizations and individual developers look for alternatives to commercial platforms the skills taught in this book are relevant and empowering leaving readers with the confidence and ability to build robust customized mapping applications without vendor lock in and at zero cost You Will Learn to develop interactive web maps Explore how to integrate geospatial services into web applications Build complete open source mapping workflows Gain the ability to prototype test and deploy custom cartographic applications This Book is For Developers looking to add mapping features to web applications Data analysts and GIS enthusiasts interested in open source spatial data Educators and students learning about geospatial technology through practical projects Tech savvy hobbyists who want to experiment with mapping tools outside of commercial platforms
