The Case of Deutsche Bank** ,2020-10-08 Seminar paper from the year 2020 in the subject Communications Public Relations Advertising Marketing Social Media grade 2 3 RWTH Aachen University Institut f r Anglistik und Amerikanistik language English abstract The present paper deals with metaphors and metonyms in advertising With the focus on the following question Why is it common to use Metaphor and Metonymy in advertisements it should be explained step by step why these concepts became common in advertising media Living in the 20th century we are experiencing a huge development in technology compared to the past In the past it was only possible to distribute advertising through television radio and newspapers Nowadays new possibilities are coming up through the expansion of social media Since almost everybody owns a smartphone most of the people are always available This gives new opportunities to the advertising industry For this purpose the first step is to try to present the complex concept of metaphor in a concise way However this can only be done superficially in the scope of this term paper otherwise the scope of the work will be exceeded Furthermore a short explanation of target and source domain is given In the second chapter the topic of metonymy is then summarized Again it should be noted that an appropriate detailed description would exceed the limits of the work In the third part of the work the actual effect of metaphors and metonyms in advertisements will be illustrated Images from a Deutsche Bank advertising campaign are used for this purpose The first part of this chapter presents the company Deutsche Bank as such This is considered important because the values of the company could be reflected in their campaigns and that aspect therefore would be important for the following analysis This is followed by an analysis of the images used in terms of metaphor and metonymy In the analysis of the metaphors the focus is on target source domain In the last chapter of the paper the work is briefly summarized The results are listed and answered regarding the question posed A short summary forms the end of the work *How Words Mean* Vyvyan Evans,2009-09-10 *How Words Mean* introduces a new approach to the role of words and other linguistic units in the construction of meaning It does so by addressing the interaction between non linguistic concepts and the meanings encoded in language It develops an account of how words are understood when we produce and hear language in situated contexts of use It proposes two theoretical constructs the lexical concept and the cognitive model These are central to the accounts of lexical representation and meaning construction developed giving rise to the Theory of Lexical Concepts and Cognitive Models or LCCM Theory Vyvyan Evans integrates and
