Competency Seeing The Bigger Picture Example:

Perspectives on Social and Business Sustainability Tay Kay Luan, 2018-10-12 Addressing the sustainability agenda is never easy. The early promises of the corporate social responsibility concept and application have raised better awareness and understanding of its concept and application. Understandably, the experience and outcome are never the same across the business and social community. To begin with, issues related to corporate social responsibility (CSR) come in hundreds of shades. The understanding of the definition alone depends on whose perspective and in what context. At the very least, there is now a greater acceptance of the concept, but increasingly, corporate leaders need no further persuasion that doing good is more than giving a donation. The myriad of CSR issues and concerns is therefore worth a relook, but from the conceptual perspectives to understanding of the challenges, impacts, and trends.

Perspectives on Social and Business Sustainability first describes the important elements of different aspects of how CSR is being understood, applied, and reported. The book examines how international trends and developments, including market and technology disruptions, will continue to shape the sustainability landscape. The book is relevant for those wanting to take a quick perspective of the evolving concept of sustainability and is also useful for those who only want to focus on a specified area within the context of social and business sustainability.

Managing the Big Picture in Colleges and Universities Richard L. Alfred, 2006 This book is intended to serve as a road map for strategy creation and execution for leaders and decision makers who, by choice or by necessity, are looking to use strategy to optimize the development of their institutions. It is the first book of its kind to focus exclusively on strategy as it applies to postsecondary education. As the authors explain, strategy is a systematic way of positioning an institution within a context of community stakeholders. In today's competitive environment, higher education leaders must become adept at differentiating their institutions from competitors to obtain the resources necessary for growth and sustainable advantage. The book begins by explaining the concept of strategy and its application. The authors describe the evolution of modern strategy and how it has been applied and developed by strategy theorists and practitioners. The book also explores how strategy is shaped by critical factors related to the mission, control, and culture of the institution. For example, strategy that is appropriate in a liberal arts college may be completely inappropriate for a community college or a teaching university. Real-world cases are employed to illustrate the applications of strategy in three different settings: a private liberal arts college, a comprehensive public institution, and a special purpose institution. The last section moves to the hands-on world of strategy formulation and implementation inside the institution. The authors end with an outline of key concepts for building a plan for implementing strategy and provide a framework for evaluating its impact.

Sergiovanni,1996 Are schools really special places or simply organizations that share the features and characteristics of all other organizations In *Leadership for the Schoolhouse* Thomas J Sergiovanni shows that schools are indeed unique places that require their own theories and practices And if schools are to improve these theories and practices cannot be imported from corporations or business schools but must emerge from and be central to what schools are like what they are trying to do and who they serve This book provides school administrators and reform activists with a comprehensive framework for creating unique leadership for the schoolhouse that is more community like more democratic and more responsive both to what we know about human nature and what know about how students learn and develop This can be accomplished Sergiovanni shows by replacing the politics of division which emphasize contracts and deals and winning and losing with the politics of virtue which emphasize a shared commitment to the common good Arguing that teacher development is the single most important key to improving schools in the long run Sergiovanni explains how we can change school cultures so that they become learning and inquiring communities for teachers as well as students Throughout the book Sergiovanni draws on numerous ideas and real life examples from a variety of schools and school districts to sort out what does and does not make sense when thinking about leadership for our schools
