acoustic relationships between twos and threes as manifested in various interrelated aspects of music including rhythm melody harmony process texture timbre and tuning and offers suggestions for how such concepts and methods might be applied effectively to the understanding of music in a variety of contexts While some of the bases for this foray into possible methods for a twenty first century music theory lie along well established acoustical and psycho acoustical lines Dr Mark Hijleh presents a broad attempt to apply them conceptually and comprehensively to a variety of musics in a relevant way that can be readily apprehended and applied by students scholars and teachers
