Software System Development A Gentle Introduction:

Software System Development Carol Britton,1996 Software Systems Development John Carter,Carol Britton,Jill Doake,2002 Written in a clear style to appeal to non specialists as well as computer professionals this text contains chapters on requirements engineering and object oriented development together with a set of exercises on modelling techniques

Object-oriented Systems Development Carol Britton,Jill Doake,2000 This is an introductory text a successor volume to the authors previous book *Software System Development A Gentle Introduction* It follows the software development process from requirements capture to implementation using an object oriented approach The book takes a practical viewpoint on developing software using object oriented techniques It provides the reader with a basic understanding of object oriented concepts without getting lost in technical detail It outlines standard object oriented modelling techniques and illustrates them with a variety of examples and exercises using Java as the language of implementation A number of case studies are introduced and developed and the mapping from the design models to the implementation code is carefully traced Software development is a skill that has to be learned by practice Through their teaching the authors have found that what students need is clear practical guidelines supported by a large number of graded examples and exercises This was the approach taken in the authors previous book which has proved to be popular and effective Many current books on this topic are very theoretical and lack the practical dimension that is so important in the learning process This book is designed as a first text for introductory undergraduate and conversion MSc O O courses

e-Technologies and Networks for Development Jim James Yonazi,Eliamani Sedoyeka,Ezendu Ariwa,Eyas El-Qawasmeh,2011-07-18 This book constitutes the proceedings of the First International Conferences on e Technologies and Networks for Development ICeND 2011 held in Dar es Salaam Tanzania in August 2011 The 29 revised full papers presented were carefully reviewed and selected from 90 initial submissions The papers address new advances in the internet technologies networking e learning software applications Computer Systems and digital information and data communications technologies as well technical as practical aspects

Proceedings of the 2012 International Conference on Information Technology and Software Engineering Wei Lu,Guoqiang Cai,Weibin Liu,Weiwei Xing,2012-11-06 Proceedings of the 2012 International Conference on Information Technology and Software Engineering presents selected articles from this major event which was held in Beijing December 8 10 2012 This book presents the latest research trends methods and experimental results in the fields of information technology and software engineering covering various state of the art research theories and approaches The subjects range from intelligent computing to information processing software engineering Web unified modeling language UML multimedia communication technologies system identification graphics and visualizing etc The proceedings provide a major interdisciplinary forum for researchers and engineers to present the most innovative studies and advances which can serve as an excellent reference work for researchers and graduate students working on information technology and software

Software Tools and Techniques for Electronic Engineers Keith Jobes, 1994 *Reverse Engineering and Software Maintenance* Kevin Lano, Howard Haughton, 1994 *An Introduction to Formal Specification with Z and VDM* Deri Sheppard, 1995 Formal methods emphasize the correct and efficient development of software This text puts formal specification in the context of traditional methods of software development including object orientation introducing these concepts and the necessary discrete maths before moving on to look at both Z and VDM in depth using the case study of a drinks dispensing machine

Software Engineering Metrics: Measures and validations Martin Shepperd, 1993 A compendium of articles by the world's leading authorities on software metrics Topics range from design specification and validation to more advanced topics such as automated measurement systems

An Introduction to Systems Analysis Techniques Mark Lejk, David Deeks, 1998 This book has been written by two lecturers who have been teaching systems analysis techniques to students for a number of years Not only have they been active practitioners with first hand knowledge of the techniques described but have also developed effective ways of getting their message across to students from a wide variety of backgrounds The book is based on the way they teach and comes across in an easy friendly and accessible style It lays a firm foundation in analysis and is suitable for a wide range of undergraduate courses The techniques introduced include spray and tree diagrams data flow diagrams data modelling normalisation and entity life histories The approach throughout is to introduce the techniques by the use of step by step worked examples

The Construction of Formal Specifications John G. Turner, T. Lee McCluskey, 1994 Introducing two widely used approaches to the formal specification of software systems this book considers VDM and the algebraic approach In each case the emphasis is intuitive rather than mathematical and shows the reader how to construct a formal specification from the first principles by using general procedures that can be followed each time Familiar applications are referred to throughout and examples small case studies and problems accompany each chapter The two approaches are brought together in one large joint case study at the end of the book as well as a section comparing and contrasting them

Introducing Specification Using Z Bryan Ratcliff, 1994 Offering an introduction to formal specification using the Z notation this practical text makes use of a series of case studies of varying complexity to illustrate the construction of good specifications in Z These case studies serve to describe the most frequently used features of Z the relevant discrete mathematics and the various techniques used The text also includes an introduction to specification validation theorem proving and refinement The importance of formal methods within software engineering is stressed throughout and there are a large number of exercises with solutions

Objects and Databases Petr Kroha, 1993 Written for applications programmers software systems developers and designers new to object technology this book presents the major features of object oriented database systems addressing common problems and the latest solutions It explains in detail how database technology can make use of fundamental object oriented concepts such as data abstraction

Andrews, Jan F. Groote, C.A. Middelburg, 2012-12-06 SoSL was the first International Workshop on Semantics of Specification Languages held from 25 27 October 1993 in Utrecht the Netherlands The workshop was organized by the Department of Philosophy of Utrecht University with financial support from the Nationale Faciliteit Informatica of the Nederlandse Organisatie voor Wetenschappelijk Onderzoek NWO and under the auspices of the British Computer Society S specialist group in Formal Aspects of Computing Science BCS FACS The concern of the workshop was the semantics of specification languages and the issues closely related to this area such as type checking and the justification of proof rules and proof obligations Its aim was the exchange of problems and ideas in this field of formal methods and the identification of common programs of work for further investigation The program of SoSL consisted of 3 invited lectures presenting the developments of the semantics of 3 major specification languages Furthermore there were 16 presentations of submitted papers This volume provides a direct account of the workshop It contains 3 papers that match the invited lectures and the 16 selected papers The editors want to thank all those who have contributed to the workshop the Program Committee and the referees for selecting the contributed papers the invited speakers for their interesting talks the Organizing Committee for all their efforts and of course the participants We have the feeling that the workshop was worthwhile and should be repeated *Exploring Osaka* David M.
