Future Communication Technology and Engineering Kennis Chan,2015-04-06 This volume contains the papers presented at the 2014 International Conference on Future Communication Technology and Engineering FCTE2014 taking place in Shenzhen China from 16 17 November 2014 Communication technologies are developing quickly and there are more possibilities for future communication technologies provided by the achievements made rather than limitations At the convention innovative and inspiring ideas were presented certain controversial topics were discussed e g what are the most efficient convenient methods for information communication and what is the most probable prospect for future communication technology It is difficult to make any definite conclusions from these presentations and discussions but the desire and drive for improvement and development shown by the participants authors are surely remarkable and respectable In this book 70 papers are included chosen from hundreds of submissions contributed by scientists from various countries and regions after careful reading and discussing by a team of reviewers These papers cover almost every possible aspect of communication technology including communication systems automation and control engineering electrical engineering AI algorithms signal processing data mining and knowledge based systems   Army of None Paul Scharre,2018-04-24 Winner of the 2019 William E Colby Award The book I had been waiting for I can t recommend it highly enough Bill Gates The era of autonomous weapons has arrived Today around the globe at least thirty nations have weapons that can search for and destroy enemy targets all on their own Paul Scharre a leading expert in next generation warfare describes these and other high tech weapons systems from Israel s Harpy drone to the American submarine hunting robot ship Sea Hunter and examines the legal and ethical issues surrounding their use A smart primer to what s to come in warfare Bruce Schneier Army of None engages military history global policy and cutting edge science to explore the implications of giving weapons the freedom to make life and death decisions A former soldier himself Scharre argues that we must embrace technology where it can make war more precise and humane but when the choice is life or death there is no replacement for the human heart   *The What and How of Modelling Information and Knowledge* C. Maria Keet,2023-11-17 The main aim of this book is to introduce a group of models and modelling of information and knowledge comprehensibly Such models and the processes for how to create them help to improve the skills to analyse and structure thoughts and ideas to become more precise to gain a deeper understanding of the matter being modelled and to assist with specific tasks where modelling helps such as reading comprehension and summarisation of text The book draws ideas and transferrable approaches from the plethora of types of models and the methods techniques tools procedures and methodologies to create them in computer science This book covers five principal declarative modelling approaches to model information and knowledge for different yet related purposes It starts with entry level mind mapping to proceed to biological models and diagrams onward to conceptual data models in software development and from there to ontologies in artificial intelligence and all the way toontology in philosophy Each

successive chapter about a type of model solves limitations of the preceding one and turns up the analytical skills a notch These what and how for each type of model is followed by an integrative chapter that ties them together comparing their strengths and key characteristics ethics in modelling and how to design a modelling language In so doing we ll address key questions such as what type of models are there How do you build one What can you do with a model Which type of model is best for what purpose Why do all that modelling The intended audience for this book is professionals students and academics in disciplines where systematic information modelling and knowledge representation is much less common than in computing such as in commerce biology law and humanities And if a computer science student or a software developer needs a quick refresher on conceptual data models or a short solid overview of ontologies then this bookwill serve them well **Critical Code** National Research Council,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee for Advancing Software-Intensive Systems Producibility,2010-10-27 Critical Code contemplates Department of Defense DoD needs and priorities for software research and suggests a research agenda and related actions Building on two prior books Summary of a Workshop on Software Intensive Systems and Uncertainty at Scale and Preliminary Observations on DoD Software Research Needs and Priorities the present volume assesses the nature of the national investment in software research and in particular considers ways to revitalize the knowledge base needed to design produce and employ software intensive systems for tomorrow s defense needs Critical Code discusses four sets of questions To what extent is software capability significant for the DoD Is it becoming more or less significant and strategic in systems development Will the advances in software producibility needed by the DoD emerge unaided from industry at a pace sufficient to meet evolving defense requirements What are the opportunities for the DoD to make more effective use of emerging technology to improve software capability and software producibility In which technology areas should the DoD invest in research to advance defense software capability and producibility **The Way We Build** Mark Erlich,2023-07-18 The construction trades once provided unionized craftsmen a route to the middle class and a sense of pride and dignity often denied other blue collar workers Today union members still earn wages and benefits that compare favorably to those of college graduates But as union strength has declined over the last fifty years a growing non union sector offers lower compensation and more hazardous conditions undermining the earlier tradition of upward mobility Revitalization of the industry depends on unions shedding past racial and gender discriminatory practices embracing organizing diversity and the new immigrant workforce and preparing for technological changes Mark Erlich blends long view history with his personal experience inside the building trades to explain one of our economy s least understood sectors Erlich s multifaceted account includes the dynamics of the industry the backdrop of union policies and powerful stories of everyday life inside the trades He offers a much needed overview of construction s past and present while exploring roads to the future Science ,2011 Software Engineering Interview Questions and Answers Manish Soni,2024-11-13 Welcome to Software Engineering
