Soft Computing Techniques in Solid Waste and Wastewater Management Rama Rao Karri, R Gobinath, Mohammad Hadi Dehghani, 2021-07-24 Soft Computing Techniques in Solid Waste and Wastewater Management is a thorough guide to computational solutions for researchers working in solid waste and wastewater management operations. This book covers in depth analysis of process variables, their effects on overall efficiencies and optimal conditions, and procedures to improve performance using soft computing techniques. These topics coupled with the systematic analyses described will help readers understand various techniques that can be effectively used to achieve the highest performance. In depth case studies along with discussions on applications of various soft computing techniques help readers control waste processes and come up with short term, mid term, and long term strategies. Waste management is an increasingly important field due to rapidly increasing levels of waste production around the world. Numerous potential solutions for reducing waste production are underway, including applications of machine learning and computational studies on waste management processes. This book details the diverse approaches and techniques in these fields, providing a single source of information for researchers and industry practitioners. It is ideal for academics, researchers, and engineers in waste management, environmental science, environmental engineering, and computing with relation to environmental science and waste management. Provides a comprehensive reference on the implementation of soft computing techniques in waste management, drawing together current research and future implications. Includes detailed algorithms used, enabling authors to understand and appreciate potential applications. Presents relevant case studies in solid and wastewater management that show real world applications of discussed technologies.

Clean-In-Place for Biopharmaceutical Processes Dale A. Seiberling, 2007-10-15 An invaluable source of instruction on the principles, instrumentation, design, implementation, operation, and maintenance of an effective clean in place system. CIP: this guide illustrates best practices and successful applications of CIP in both pharmaceutical and biotechnology facilities. Offering reader friendly descriptions of the various types of equipment and materials found in typical CIP processes. Clean In Place For Biopharmaceutical Processes will take the guess work out of CIP development and illustrate all one needs to know for the establishment and optimal functioning of a CIP system.

Optimization of Pharmaceutical Processes Antonios Fytopoulos, Rohit Ramachandran, Panos M. Pardalos, 2022-04-06 Optimization of Pharmaceutical Processes presents contributions from leading authorities in the fields of optimization and pharmaceutical manufacturing. Formulated within structured frameworks, practical examples and applications are given as guidance to apply optimization techniques to most aspects of pharmaceutical processes, from design to lab and pilot scale, and finally to manufacturing. The increasing demand for better quality, higher yield, more efficient, optimized, and green pharmaceutical processes indicates that optimal conditions for production must be applied to achieve simplicity, lower costs, and superior yield. The application of such methods in the pharmaceutical industry is not trivial. Quality

of the final product is of major importance to human health and the need for deep knowledge of the process parameters and the optimization of the processes are imperative The volume which includes new methods as well as review contributions will benefit a wide readership including engineers in pharmaceuticals chemical biological to name just a few
