Teaching Computing Henry M. Walker, 2018-04-24. Teaching can be intimidating for beginning faculty. Some graduate schools and some computing faculty provide guidance and mentoring but many do not. Often a new faculty member is assigned to teach a course with little guidance, input or feedback. *Teaching Computing: A Practitioner's Perspective* addresses such challenges by providing a solid resource for both new and experienced computing faculty. The book serves as a practical, easy-to-use resource covering a wide range of topics in a collection of focused, down-to-earth chapters. Based on the author's extensive teaching experience and his teaching-oriented columns that span 20 years and informed by computing education research, the book provides numerous elements that are designed to connect with teaching practitioners, including a wide range of teaching topics and basic elements of teaching, including tips and techniques. Practical tone: the book serves as a down-to-earth practitioners' guide. Short, focused chapters. Coherent and convenient organization. Mix of general educational perspectives and computing-specific elements. Connections between teaching in general and teaching computing. Both historical and contemporary perspectives. This book presents practical approaches, tips and techniques that provide a strong starting place for new computing faculty and perspectives for reflection by seasoned faculty wishing to freshen their own teaching.

Java Programming Judy Scholl, 2003. Designed to accompany *Java Programming: From Problem Analysis to Program Design* by D. S. Malik, this student lab manual is ideal for the serious Java student. Featuring extensive additional student exercises, students are able to further challenge themselves and gain additional exposure and understanding of difficult Java topics all in a lab setting.
