

CONSTRUCTION CASE STUDY FREE DOWNLOAD

Free Construction Case Study

Company Overview

Robust Construction Co. is one of the country's top construction companies. Established in 2000, the company has been building houses and schools for over 20 years. Aside from this, the company has provided other construction services to partner tech at safe and instant communication lines on site.

Market

The company caters to individuals and school extensions, respectively. It also aims to develop housing programs, IT, and technology provided by Robust.

Challenges

On-site communication has been often a challenge for construction companies. Without efficient on-site communication, project delivery can be delayed. In 2019, the company found that most of the time, changes or status reports are not known instantly because construction projects lasted a month longer on average.

Solutions

Robust employed a simple radio communication in one of its construction projects in 2019. It found that radio communication, because the radio is lightweight and easy to use, Robust was able to effectively communicate. As a result, the construction project was finished 2 weeks earlier than other construction projects. Robust gained extra time in 2019.

Conclusion

Because of this experience, Robust Construction Co. learned available technology to improve its work strategies. Radio communication helps Robust Construction Co. improve its delivery projects, and increase revenues by more than 50%.

Free Construction Case Study

Company Overview

Robust Construction Co. is one of the country's top construction companies. Established in 2000, the company has been building houses and schools for over 20 years. Aside from this, the company has provided other construction services to partner tech at safe and instant communication lines on site.

Market

The company caters to individuals and institutions who want to build residential houses and school extensions, respectively. It also serves as a contractor to other business partners who want to develop housing programs. Other construction companies only use construction services and technology provided by Robust.

Challenges

On-site communication has been often a challenge for construction companies. Without efficient and effective on-site communication, significant delays in project delivery are bound to happen. In 2019, Robust assessed its efficiency in project delivery and found that most of the time, changes or modifications to the original construction plan or status reports are not known instantly because there is a manual relay of information. As a result, construction projects lasted a month longer on average.

Solutions

Robust employed a simple radio communication solution as a pilot implementation program in one of its construction projects in 2019. It learned that the radio is lightweight, easy to use, and has minimal licensing requirements. Robust was able to effectively communicate despite weak internet signals. As a result, the construction project was finished 2 weeks ahead of schedule. When it was applied to other construction projects, Robust gained extra time to accommodate 4 more projects in 2019.

Conclusion

Because of this experience, Robust Construction Co. learned to adapt to the times and maximize available technology to improve its work strategies. Radio technology is one of the best that the company enjoys. Robust Construction Co. expects to develop its efficiency further, acquire more projects, and increase revenues by more than 50%.
