The cases selected are representative of industrial grade projects and span a variety of application domains. The study had three main objectives: To better inform deliberations within industry and government on standards and regulations; To provide an authoritative record on the practical experience of formal methods to date; and To suggest areas where future research and technology development are needed. This study was undertaken by three experts in formal methods and software engineering: Dan Craigen of ORA Canada, Susan Gerhart of Applied Formal Methods, and Ted Ralston of Ralston Research Associates. Robin Bloomfield of Adelard was involved with the Darlington Nuclear Generating Station Shutdown System case. Support for this study was provided by organizations in Canada and the United States.
