

CS51 SOFTWARE ENGINEERING

UNIT I

SOFTWARE PRODUCT AND PROCESS

Software engineering paradigm:

- The framework activities will always be applied on every project ... BUT the tasks (and degree of rigor) for each activity will vary based on:
 - the type of project
 - characteristics of the project
 - common sense judgment; concurrence of the project team

The software process:

- A structured set of activities required to develop a software system
 - Specification;
 - Design;
 - Validation;
 - Evolution.
- A software process model is an abstract representation of a process. It presents a description of a process from some particular perspective.

Waterfall model/Linear Sequential Model/classic life cycle :

- **Systems Engineering**
 - Software as part of larger system, determine requirements for all system elements, allocate requirements to software.
- **Software Requirements Analysis**
 - Develop understanding of problem domain, user needs, function, performance, interfaces, ...
 - **Software Design**
 - *Multi-step process to determine architecture, interfaces, data structures, functional detail. Produces (high-level) form that can be checked for quality, conformance before coding.*
- **Coding**
 - Produce machine readable and executable form, match HW, OS and design needs.
- **Testing**

Software Engineering Lecture Notes Ppt Pressman
