Transcript

The photos are connected with the topic of school. Both photos show students in class.

In the first photo I imagine that they're about 13 years old. It looks like a science lesson and judging by the students' expressions, I'd say that they are enjoying their lesson. They look interested and it looks as though they are working hard. Most of them are looking at the experiment and working together. They are all wearing uniform – it's quite an old-fashioned-looking uniform, so I would guess that it's a private school, but it could be a state school. It's hard to say.

- 2 1 I reckon they are about 17 years old.
2 It's a mixed class of girls and boys.
3 It's difficult to tell what kind of lesson they're in.
4 It could be that they're in a maths lesson.
5 It looks as if one of them is asleep.
6 It's clear that the girl in the front desk isn't interested.

Transcript

The second photo also shows students in a classroom. I reckon they are about 17 years old. It's a mixed class of boys and girls. It's difficult to tell what kind of lesson they're in. Their teacher is handing a paper to one student. It could be that they're in a maths lesson. These students aren't wearing uniform. It looks as if one of them is asleep. It's clear that the girl in the front desk isn't interested in the lesson or perhaps she doesn't understand what she has to do.

Drive Right Answers:

Yes, I Can Change , Information Structure in Sign Languages Vadim Kimmelman,2019-02-19 This book presents a first comprehensive overview of existing research on information structure in sign languages Furthermore it is combined with novel in depth studies of Russian Sign Language and Sign Language of the Netherlands The book discusses how topic focus and contrast are marked in the visual modality and what implications this has for theoretical and typological study of information structure Such issues as syntactic and prosodic markers of information structure and their interactions relations between different notions of information structure and grammaticalization of markers of information structure are highlighted Empirical studies of the two sign languages also showcase different methodologies that are used in such research and discuss their advantages and disadvantages The book contains a general introduction to the field of information structure and thus can be used by linguists new to the field

The Chosen Arthur Ian Brown,2010-04 **Verbal Behavior** Burrhus Frederic Skinner,1957 *The Syntax of Yes and No* Anders Holmberg,2016 This book is a cross linguistic study of the syntax of yes no questions and their answers drawing on data from a wide range of languages with particular focus on English Finnish Swedish Thai and Chinese There are broadly two types of answer to yes no questions those that employ particles such as yes and no as found in English and those that echo a part of the question usually the finite verb with or without negation as found in Finnish The latter are uncontroversially derived by ellipsis while the former have been claimed to be clause substitutes Anders Holmberg argues instead that even answers that employ particles are complete sentences derived by ellipsis from full sentential expressions and that the two types share essential syntactic properties The book also examines the related cross linguistic and intralinguistic variation observed in answers to negative questions such as does he not drink coffee whereby yes in one language appears to correspond to no in another The book illustrates how a seemingly trivial phenomenon can have the most wide ranging consequences for theories of language and will be of interest not only to theoretical linguists but also to students and scholars of typological and descriptive linguistics
