Through a method known as literate programming the authors combine human readable documentation and source code into a single reference that is specifically designed to aid comprehension. The result is a stunning achievement in graphics education. Through the ideas and software in this book users will learn to design and employ a fully featured rendering system for creating stunning imagery. This completely updated and revised edition includes new coverage on ray tracing hair and curves primitives numerical precision issues with ray tracing LBVHs realistic camera models the measurement equation and much more. It is a must have full color resource on physically based rendering. Presents up to date revisions of the seminal reference on rendering including new sections on bidirectional path tracing numerical robustness issues in ray tracing realistic camera models and subsurface scattering. Provides the source code for a complete rendering system allowing readers to get up and running fast. Includes a unique indexing feature literate programming that lists the locations of each function variable and method on the page where they are first described. Serves as an essential resource on physically based rendering. *Elements of Dynamic* William Kingdon Clifford, 1878
