and Mortensen propose that alignment with Family Life Education's FLE strengths based methodology results in greater consistency through a model of prevention education and collaboration with families. This text is the first to outline linkages between FLE and EHS home visiting. It explores a qualitative study of FLE integrated in a current EHS home based program and application of FLE methodology to home visiting topics. This approach will influence professional practice and provide a foundation for developing evidence based home visiting practices. Online content accompanies the text with videos demonstrating the FLE approach in action and discussion questions to encourage engagement with and understanding of the core material. *Transforming Early Head Start Home Visiting: A Family Life Education Approach* is essential reading for upper level undergraduate and masters students in family studies and early childhood education as well as practitioners working with children and families. *A Textbook of Community Nursing* Sue Chilton, Heather Bain, 2024-12-23. It provides a comprehensive and holistic approach helping nurses, therapists and social care professionals to better understand the impact of ageing upon the person and wider society. A unique feature of this text is the focus upon positive ageing and the attempt to dispel and challenge some of the myths, prejudices and negative attitudes that still prevail towards ageing and older people. A key objective of the book is to introduce practitioners to some of the neglected or under addressed aspects of ageing such as spirituality, sexuality and LGBT. Chapters are written in an engaging and interactive style and where appropriate draw upon case studies and scenarios to maximize engagement, developing competence by informing knowledge, attitudes and skills. The text introduces the practitioner to key dimensions of what it is to be a person, physically, psychologically, socially and spiritually and how these contribute to the ageing process and can enhance the quality of life of older people. Irrespective of whether one cares for older people in an acute hospital setting or domiciliary home care, this text will be of relevance. The material and content transcend health and social care boundaries providing valuable contemporary evidence that can inform and shape practice. Above all, this text will

encourage reflection dialogue and engagement with some fundamental aspects of ageing challenging attitudes values and behaviour so that a more positive and balanced insight towards ageing is fostered This book will ensure that self awareness and professional practice are enriched and informed and the practitioner has a holistic understanding of ageing that will enable them to care for older people with compassion dignity and respect **Subject Guide to Books in Print** ,1971
