Process Control Systems Industrial Automation Training:

Getting Skills Right Training Supply for the Green and AI Transitions Equipping Workers with the Right Skills OECD,2024-12-11 Adult learning systems are being called upon to prepare workers for major labour market shifts including the green transition and the rise of artificial intelligence AI in the workplace While initial education is important upskilling and reskilling the existing workforce is essential to help individuals and businesses adapt and prepare for these transitions Policy makers face the challenge of ensuring training is both relevant and inclusive yet there is limited understanding of whether current training supply is sufficient to meet current and future skill needs Most research focuses on the demand for skills with little insight into the supply To fill this gap this report uses evidence from new OECD questionnaires and an analysis of training catalogues to evaluate whether current training supply aligns with the skills needed for the green and AI transitions It also provides insight into the accessibility and flexibility of training efforts to guide policy makers in their efforts to develop more effective inclusive training strategies *Control Engineering* ,1994 Instrumentation and automatic control systems **Trends in Control and Measurement Education** D.P. Atherton,D.A. Linkens,2014-06-28 This volume is the published Proceedings of selected papers from the IFAC Symposium Swansea 11 13 July 1988 where a forum was provided for discussion of the latest advances and techniques in the education of control and instrument engineers Seven major topics were covered to aid lecturers in understanding developing and presenting systems engineering control and measurement as a subject to undergraduate and postgraduate students The teaching of real time computer control as a topic and laboratory experiments for both continuous and discrete systems were discussed as was process control with the emphasis on providing the student with engineering experience by using scaled down equipment which would teach practical skills Included in the Proceedings are papers on measurement and instrumentation an area felt to be neglected within academic instruction The development of software tools for systems design within systems engineering was included as was the exchange of teaching packages and methods between academics and the education curriculum of systems engineering within developing countries These Proceedings will prove to be a useful up to date guide and reference source for all lecturers and professors involved in curriculum development and the teaching of control and measurement in systems engineering **Towards a Hybrid, Flexible and Socially Engaged Higher Education** Michael E. Auer,Uriel R. Cukierman,Eduardo Vendrell Vidal,Edmundo Tovar Caro,2024-02-25 We are currently witnessing a significant transformation in the development of education on all levels and especially in post secondary education To face these challenges higher education must find innovative and effective ways to respond in a proper way The pandemic period left us with profound changes in the way we teach and learn including the massive use of new means of communication such as videoconferencing and other technological tools Moreover the current explosion of artificial intelligence tools mainly used by students is challenging teaching practices maintained for centuries Scientifically based statements as well as excellent
