## *Nature, classification and sources of law*

It aims at equipping a law student with different skills that will help a law student to be capable to study law.

**LAW:** there are different definition of the term law meaning that there are many authors who have different definitions.

The encyclopedia says that law comprises of all principals, rules and enactments that are applied in courts and enforced by the the state

From oxford English dictionary says that law is the body of rules whether proceeding from formal enactment or from customs which a particular state or community recognizes .

Law is a body of principals recognized and applied by the states in the administration of justice.

According to Blackstone he says law is a rule of civil conduct prescribed by the supreme power in the state, commanding what is right and prohibiting what is wrong.

According to Simonton he says that law is the body of principals and rules recognized and enforced by the courts by which the relations of the members of the community with each other are regulated

Generally law is a body of rules and principals recognized by a particular state and enforced by it to administer justice and regulate social behavior. By regulating social behavior the law brings about equilibrium by balancing the conflicting interests in a particular community.

For the law to be in a position to achieve this it must set a standard of behavior that ought to be complied by every citizen, this standard is enforced by the state through imposition of penalties for those who go against it, this is known as normativity character of law.

**NORMATIVITY CHARACTER OF LAW:** this is the character of law that differentiate law from other things where by it establishes standards where by when someone goes against those standards a punishment is given to him or her. But law is created and regulated by a state while others are just created by customs.

## ***FUNCIONS OF LAW***

Law has mainly three basic functions which are as follows

### **PERMISSIVE FUNCTION**

This is the function of law that actually allows or permits the subjects of it to do or engage in a range of transactions for example entering into marriage, entering into contracts, in cooperative companies etc.

*Nigerian Legal Methods* C. C. Ohuruogu, O. T. Umahi, 2013-09-27 This text is a collection of writings on assigned topics by some scholars and lecturers in the Faculty of Law at Benson Idahosa University and those invited from outside the university. The idea to write a text for use in the study of legal methods for law students was borne out of the desire to present a range of updated material in this area of study. The focus of this text is Nigeria. The book is written in simple, easy-to-understand language and meant essentially for law students in the first year of the five-year course in Law as structured by the National Universities Commission (NUC). Nevertheless, persons who are in need of information or education on different aspects of the Nigerian legal process will also find aspects of the text useful. The contributors come from diverse backgrounds and experiences which is reflected in their styles of presentation. However, each has endeavoured to present the assigned topic in such a form as to enhance comprehension by the primary beneficiaries. The inclusion of chapters on advocacy and mooted skills as well as examination skills and strategies makes this text unique and allows it to offer more detailed analysis than existing texts in Nigeria provide.

Legal Method and Reasoning Hanson, 2003-06-30 Written to provide an integrated teaching tool for courses in legal method, this book encourages debate and critical thinking in new students. It covers the how-to of language skills, study skills, argument skills, and legal knowledge.

French Legal Method Eva Steiner, 2002 The chief purpose of this book is to assist increasing numbers of students involved in Anglo-French Law programmes to work out the techniques of legal analysis in France in the course of their legal studies in French Law. The book also brings together the theory and practice of legal reasoning in France in a comparative perspective. The book covers the core areas found at the beginning of a French Law degree such as the legislative process, statutory interpretation, codification, case law, law reform, judges, reasoning, judicial style, and case notes. It also includes a chapter on legal education with example legal exercises, essays, a problem question, and a case study, as well as advice on examinations in French Law. Law reform in England increasingly concerns itself with an examination of the legal method employed in Continental legal systems, particularly France, and this book makes an ideal tool for those involved in the practice and research surrounding law reform.

Legal Method Sharon Hanson, 2000-10-17 The competent study of law is a finely tuned balance of excellent language ability, good reading and writing skills, good personal study discipline, a thorough appreciation of the relevant areas of substantive law, and excellent argumentative skills. Legal method is an important area of study for two main reasons. First, it is important for the range of techniques that it can offer to break into legal texts, both primary and secondary. Secondly, it exposes reasoning processes concerned with the theory and practice of law. The book deals in both the areas mentioned and aims to deal with issues of
