Define a clear governance around cybersecurity at port level involving all stakeholders involved in port operations Indeed many companies are involved in port operation port operators Port Authority pilotage company shipping companies etc it is crucial to ensure they are all involved in cybersecurity matters and aware about how they participate to the global port operation security Raise awareness of cybersecurity matters at port level and infuse a cybersecurity culture Indeed the maritime sector is historically very aware of safety and security matters but it seems cybersecurity is not fully integrated yet in stakeholders minds This measure shall be combined with training to ensure proper understanding of cybersecurity matters and ability to enforce it in daily operations Enforce the technical cybersecurity basics like network segregation updates management password hardening segregation of rights etc In the context of OT with legacy systems that usually cannot be updated network segregation and password protection are key to ensure a correct level of cybersecurity Consider security by design in applications especially as ports use many systems some of which are opened to third parties for data exchange Any vulnerability on those systems can be a gate to compromise the port systems Enforce detection and response capabilities at port level to react as fast as possible to any cyberattack before it impacts port operation safety or security Ports can rely on simple detection measures such as alerts when a specific action is done authentication attempt on a very critical asset for example or search for Indicators of Compromise IOC or on more comprehensive using machine learning to correlate information and identify compromising patterns Such initiatives have already started to rise within ports ecosystem
