

## Gradient concept

In addition to color swatches, you can use the ability to apply various gradients to objects.

1 With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Linear** to apply a default gradient. Drag across your object to create a custom path for the gradient.

2 Drag across the artwork to change the length and direction of the gradient path, and drag the midpoint marker to change the midpoint of the gradient between the current colors.

3 Rotate the circle along the axis to apply a blue gradient to the object, which can then be moved along the gradient path.

With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Radial** to apply a default gradient. Drag across your object to create a custom path for the gradient.

An alternative to an address to working with gradients directly on the object, there is a **Gradients** editor available from the **Color** window on the toolbar. This **Gradients** editor gives you high precision drag positioning as well as a few additional options.

You can work with **Elliptical**, **Radial**, and **Angular** gradients in Adobe Photoshop. To create a custom path for a gradient, use the **Type** pop-up menu on the top-left corner of the **Gradients** editor. Gradients of each type are shown in the **Gradients** window.
