SEVENTH EDITION (REVISION 2014) 141-1000-1-14000 PRODUCT NO. 940007

This recommended practice addresses general principles for the safe installation and maintenance of offshore, pedestal-mounted rotating cranes on fixed or floating offshore platforms, offshore support vessels, and drilling rigs, semi-submersible drilling rigs and other types of mobile offshore drilling units (MODUs). This document also provides recommendations and instructions for pedestal turning, lift lowering, service operations, and testing of rotating cranes that are mounted offshore.

These applications (as shown, but not not limited to the following):

- a) Offshore oil exploration and production applications. These cranes are typically mounted on a fixed structure, platform, structure, floating platform, structure, or ship-shaped vessel used in drilling and production operations for offshore cranes and storage.
- b) Offshore applications. These lifting devices (rated for 20,000 lbs (9000 kg) or more) are mounted on surface vessels used to lift and move offshore structures, pipes, diving bells, systems, cables, components, and other materials on the vessel. Service vessels, see (for use on 60, 80, and 100).
- c) Drilling rig applications. These lift/lower applications are mounted on derrick, self-erecting cranes or other vessels, and are used in construction and storage operations above and below the sea surface.

Equipment as a result of such testing used here for loading, lowering, operations (as shown in the table) and not included in the scope of this recommended practice.

Lifting devices not covered by this document should be applied, installed, and maintained in accordance with the manufacturer's recommendations.
