Policing and Training Issues Michael Palmiotto, 2003 On almost a daily basis somewhere in the United States a police officer commits an act that often leads to a question of his or her training. After selection perhaps the most crucial aspect of police officer development is the training. Even the U S Supreme Court has weighed in on this subject by holding that a police agency and its governing body could be sued for a failure to adequately train or for failing to provide training to police officers. Considering the importance of this topic one would think that there would be numerous books on the subject. Yet to date there are a very limited number. Policing and Training Issues is among the first edited works available offering an important array of training topics. In Policing and Training Issues Dr Michael Palmiotto and his co authors have created a textbook that examines some of today's most important training subjects. It begins with an overview of police training throughout police history and includes subjects on academy management, executive training, police corps learning theories and developing skills as well as other specialty subjects such as multicultural training, field training, officers, criminal investigations and community policing. The text concludes with a chapter that integrates all topics covered as well as a look at the future of police training. This new textbook represents an in depth examination of policing and various related training issues through the perspectives of respected academics and practitioners. This textbook will help broaden the reader's understanding of the relationship between the police and their training.
