Mohamed Abd Elaziz,Mohamed Medhat Gaber,Shaker El-Sappagh,Mohammed A. A. Al-qaness,Ahmed A. Ewees,2023-05-02 This book collects different artificial intelligence methodologies that applied to solve real world problems This book has exciting chapters that employ artificial intelligence and applied to different applications based on integration with meta heuristic and other techniques The area of applications is including medical diagnosis text analysis cloud computing and others which will enrich the reader In this sense the book provides practical and theory content with novel artificial intelligence techniques The chapters were compiled using a scientific perspective Accordingly the book is primarily intended for undergraduate and postgraduate students of science engineering and computational mathematics and is applied in courses on artificial intelligence optimization techniques advanced machine learning among others Mechatronics Engineering, Computing and Information Technology X.D. Xu,Bin Li,Q.M. Lu,X.Y. Yan,J.L. Li,2014-05-23 Selected peer reviewed papers from the 2014 International Conference on Mechatronics Engineering and Computing Technology ICMECT 2014 April 9 10 2014 Shanghai China Manufacturing Engineering Handbook, Second Edition Hwaiyu Geng,2015-10-22

The new edition of this professional resource reveals how to optimize all aspects of the global manufacturing process to build

the highest quality goods at the lowest price in the shortest possible time How can one apply technical and business knowledge to develop a strategic plan that delivers increased productivity quality sustainability reliability agility resilience and best practices with rapid time to production and value The answers are found in the fully updated new edition of Manufacturing Engineering Handbook The goal of this second edition is to provide the essential knowledge needed to build products with the highest quality at the lowest cost in the least amount of time by optimizing all aspects of the manufacturing process design development tools processes quality speed output safety and sustainability You will gain access to information on conventional and modern technologies manufacturing processes and operations management that will assist you in achieving these goals The book is written by a team of more than 100 internationally renowned manufacturing engineering experts and pared down from its original 1200 pages The new and vastly improved second edition is specifically designed to concisely and succinctly cover traditional manufacturing processes and advanced technologies as well as newer manufacturing software and systems to integrate them into the modern global manufacturing world Brand new chapters on eco design and sustainability nano materials and nano manufacturing facilities planning operations research New sections on plastics composites and moldmaking global manufacturing and supply chain management Increased coverage of Design for Six Sigma and adaptive manufacturing Affiliated web site with color illustrations graphs charts discussions on future trends additional technical papers and suggestions for further reading *Vietnam Economic News* ,2011-08-30 [Smart Cities](#) Schahram Dustdar,Stefan Nastic,Ognjen Šćekić,2017-05-28 This book presents a coherent novel vision of Smart Cities built around a value driven architecture It describes the limitations of the contemporary notion of the Smart City and argues that the next developmental step must actively include not only the physical infrastructure but information technology and human infrastructure as well requiring the intensive integration of technical solutions from the Internet of Things IoT and social computing The book is divided into five major parts the first of which provides both a general introduction and a coherent vision that ties together all the components that are required to realize the vision for Smart Cities Part II then discusses the provisioning and governance of Smart City systems and infrastructures In turn Part III addresses the core technologies and technological enablers for managing the social component of the Smart City platform Both parts combine state of the art research with cutting edge industrial efforts in the respective fields Lastly Part IV details a road map to achieving Cyber Human Smart Cities Rounding out the coverage it discusses the concrete technological advances needed to move beyond contemporary Smart Cities and toward the Smart Cities of the future Overall the book provides an essential overview of the latest developments in the areas of IoT and social computing research and outlines a research roadmap for a closer integration of the two areas in the context of the Smart City As such it offers a valuable resource for researchers and graduate students alike *Innovations in Smart Cities Applications Edition 2* Mohamed Ben Ahmed,Anouar Abdelhakim Boudhir,Ali Younes,2019-02-06 This book highlights cutting edge research presented at the third installment of the

International Conference on Smart City Applications SCA2018 held in T touan Morocco on October 10 11 2018 It presents original research results new ideas and practical lessons learned that touch on all aspects of smart city applications The respective papers share new and highly original results by leading experts on IoT Big Data and Cloud technologies and address a broad range of key challenges in smart cities including Smart Education and Intelligent Learning Systems Smart Healthcare Smart Building and Home Automation Smart Environment and Smart Agriculture Smart Economy and Digital Business and Information Technologies and Computer Science among others In addition various novel proposals regarding smart cities are discussed Gathering peer reviewed chapters written by prominent researchers from around the globe the book offers an invaluable instructional and research tool for courses on computer and urban sciences students and practitioners in computer science information science technology studies and urban management studies will find it particularly useful Further the book is an excellent reference guide for professionals and researchers working in mobility education governance energy the environment and computer sciences
