## **Statistics Kenya Unsd:**

*Measuring Global Migration* Frank Laczko, Elisa Mosler Vidal, Marzia Rango, 2023-12-22 This book focuses on how to improve the collection analysis and responsible use of data on global migration and international mobility While migration remains a topic of great policy interest for governments around the world there is a serious lack of reliable timely disaggregated and comparable data on it and often insufficient safeguards to protect migrants information Meanwhile vast amounts of data about the movement of people are being generated in real time due to new technologies but these have not yet been fully captured and utilized by migration policymakers who often do not have enough data to inform their policies and programmes The lack of migration data has been internationally recognized the Global Compact for Safe Orderly and Regular Migration urges all countries to improve data on migration to ensure that policies and programmes are evidence based but does not spell out how this could be done This book examines both the technical issues associated with improving data on migration and the wider political challenges of how countries manage the collection and use of migration data The first part of the book discusses how much we really know about international migration based on existing data and key concepts and approaches which are often used to measure migration The second part of the book examines what measures could be taken to improve migration data highlighting examples of good practice from around the world in recent years across a range of different policy areas such as health climate change and sustainable development more broadly Written by leading experts on international migration data this book is the perfect guide for students policymakers and practitioners looking to understand more about the existing evidence base on migration and what can be done to improve it
