Sixty papers were selected for full presentation. Only those successfully presented at the conference are included in these proceedings. Despite its small population, Australia has always had a high level of international activity in control, with Australian researchers contributing world-leading academic work in control. It has had a President of IFAC itself, Professor Brian Anderson, and many names are instantly recognisable at the forefront of developments in control theory. It also has major industrial processes in minerals, petrochemicals, food, and agricultural processing, in manufacturing, in transport, and in communications that look to control for safety, efficiency, and reduced environmental impacts. The education of engineers in the various aspects of control is thus of vital importance to Australia, as it is to all developed and developing countries.
