

4-1 Study Guide and Intervention

Classifying Triangles

Classify Triangles by Angles One way to classify a triangle is by the measures of its angles.

• If all three of the angles of a triangle are acute angles, then the triangle is an acute triangle .
• If all three angles of an acute triangle are congruent, then the triangle is an equiangular triangle .
• If one of the angles of a triangle is an obtuse angle, then the triangle is an obtuse triangle .
• If one of the angles of a triangle is a right angle, then the triangle is a right triangle .

Example: Classify each triangle.

All three angles are congruent, so all three angles have measure 60° . The triangle is an equiangular triangle.

The triangle has one angle that is obtuse. It is an obtuse triangle.

The triangle has one right angle. It is a right triangle.

Exercises

Classify each triangle as *acute*, *equiangular*, *obtuse*, or *right*.
