

Ohm's law

Aim: - To determine resistance per cm of a given wire by plotting a graph of potential difference versus current.

Circuit diagram

Theory

According to Ohm's law, the current flowing through a conductor is directly proportional to the potential difference across its ends provided the physical conditions like temperature and pressure of the conductor remain the same.

$$i.e. \quad V \propto I$$

$$V = RI$$

where R is a constant called resistance of the conductor.

$$or \quad \boxed{R = \frac{V}{I}}$$

Procedure

1. Arrange the apparatus in the manner as given in the circuit diagram.
