

# CHAPTER 3

## ACCOUNTING RATIOS (RATIO ANALYSIS)

### CONCEPT OF RATIO

A ratio is a relationship between two related figures, expressed mathematically. It shows numerical relationship between two figures. It is found by dividing one number by the other number.

### MEANING OF ACCOUNTING RATIO

Accounting ratios are ratios calculated from financial statements.

According to J. Batty, *"the term accounting ratio is used to describe the significant relationship which exists between figures shown in a Balance Sheet, P/L A/c, in a budgetary control system or in any other part of the accounting organization"*.

Thus, accounting ratios are relationships, expressed in mathematical terms, between accounting figures which are connected with each other. In short, accounting ratios are ratios based on accounting data.

### EXPRESSION (OR FORMS) OF RATIO

- 1. Proportion:** In this case, the relationship between two figures is expressed in form, denominator 1 or example, if current assets are Rs:1,50,000 and current liabilities are 50,000, The ratio between current assets and current liabilities will be 3:1 (1,50,000/ 50,000), The second term will always be 1.
