## **Evera Guide To Methods For Students Of Political Science:**

Guide to Methods for Students of Political Science Stephen Van Evera, 2015-04-15 Stephen Van Evera greeted new graduate students at MIT with a commonsense introduction to qualitative methods in the social sciences His helpful hints always warmly received grew from a handful of memos to an underground classic primer That primer evolved into a book of how to information about graduate study which is essential reading for graduate students and undergraduates in political science sociology anthropology economics and history and for their advisers How should we frame assess and apply theories in the social sciences I am unpersuaded by the view that the prime rules of scientific method should differ between hard science and social science Science is science A section on case studies shows novices the ropes Van Evera contends the realm of dissertations is often defined too narrowly Making and testing theories are not the only games in town If everyone makes and tests theories but no one ever uses them then what are they for In *Helpful Hints on Writing a Political Science Ph D Dissertation* Van Evera focuses on presentation and on broader issues of academic strategy and tactics Van Evera asks how political scientists should work together as a community All institutions and professions that face weak accountability need inner ethical rudders that define their obligations in order to stay on course

Wars of Revelation Rebecca Lissner, 2021-10-26 As American foreign policy experts anticipate a new Cold War with China there is no better time to reflect on the evolution of the United States grand strategy during its decades long contest with Russia Lissner shows that military interventions in Korea Vietnam and Iraq were crucibles for American foreign policy in the latter half of the 20th century testing strategic axioms on the battlefield and compelling adjustments to Washington s conception of its global role In each case these wars of revelation provided searing insights into the capabilities and intentions of America s most dangerous international adversaries as well as the potential and limits of its own national power By centering her narrative of post World War II American foreign relations on these

pivotal episodes Lissner provides an historically rich and theoretically compelling narrative that will interest readers keen to understand the past present and future of US grand strategy

**Youth and Post-conflict Reconstruction** Stephanie Schwartz,2010 In Youth and Post Conflict Reconstruction Agents of Change Stephanie Schwartz goes beyond these highly publicized cases and examines the roles of the broader youth population in post conflict scenarios taking on the complex task of distinguishing between the legal and societal labels of child youth and adult

**China, Faits Accomplis and the Contest for East Asia** Joshua Haste,2023-04-28 This book explores China s use of faits accomplis in its periphery and offers the first formal model for the use of faits accomplis by rising powers With growing attention to great power competition and conflict in the gray zone between war and peace this book explains China s use of faits accomplis to revise the maritime status quo in the South and East China Seas Using formal modelling and case study analysis the book argues that while power shifts provide rising states with opportunities to impose faits accomplis to revise the status quo the use of faits accomplis also increase the likelihood of war with the dominant state s The book surveys existing understandings of how power shifts incentivize interstate competition in general and in the case of Sino American competition in particular and brings existing theory and novel modelling to explain China s differing strategies in the South and East China Seas in the first two decades of the 21st century The book concludes by using the lessons from these cases to assess the strategic options available to both states and conditions that make a peaceful resolution more likely This book will be of much interest to students of Chinese politics Asian security studies and International Relations

**Balancing Risks** Jeffrey W. Taliaferro,2019-06-30 Great powers often initiate risky military and diplomatic inventions in far off peripheral regions that pose no direct threat to them risking direct confrontation with rivals in strategically inconsequential places Why do powerful countries behave in a way that leads to entrapment in prolonged expensive and self defeating conflicts Jeffrey W Taliaferro suggests that such interventions are driven by the refusal of senior officials to accept losses in their state s relative power international status or prestige Instead of cutting their losses leaders often continue to invest blood and money in failed excursions into the periphery Their policies may seem to be driven by rational concerns about power and security but Taliaferro deems them to be at odds with the master explanation of political realism Taliaferro constructs a balance of risk theory of foreign policy that draws on defensive realism in international relations and prospect theory in psychology He illustrates the power of this new theory in several case narratives Germany s initiation and escalation of the 1905 and 1911 Moroccan crises the United States involvement in the Korean War in 1950 52 and Japan s entanglement in the second Sino Japanese war in 1937 40 and its decisions for war with the U S in 1940 41

**Great Power Security Cooperation** David W. Kearn,2014-12-18 This book explains the conditions under which great powers are likely to cooperate to improve their security by engaging in qualitative arms control In agreeing to limit or proscribe certain classes of weapons states will constrain their military capabilities and therefore decrease the threat they pose to potential adversaries Focusing on the

expected military impact of technological change and the capacity of states to confidently monitor the activities of its negotiating partners it may be possible to forge lasting agreements that improves the security of the participating states However at other times the nature technological change may force states to engage in competitive behavior precluding cooperation and increasing the probability of conflict Examining a diverse set of cases including the Washington Naval Conference The World Disarmament Conference at Geneva the Baruch Plan for the International Control of Atomic Energy and the SALT I Accords including the ABM Treaty this volume presents a persuasive comprehensive and interesting contribution to the literature on arms racing and arms control and should be of interest to students of international relations theory and security studies By presenting a theoretical informed model that explicitly links the security strategies of states to their choices about development and deployment of new weapons and consequently their willingness to engage in arms control cooperation this book provides an important refinement upon existing theoretical and historical approaches

Black Gold and Blackmail Rosemary A. Kelanic, 2020-05-15 Black Gold and Blackmail seeks to explain why great powers adopt such different strategies to protect their oil access from politically motivated disruptions In extreme cases such as Imperial Japan in 1941 great powers fought wars to grab oil territory in anticipation of a potential embargo by the Allies in other instances such as Germany in the early Nazi period states chose relatively subdued measures like oil alliances or domestic policies to conserve oil What accounts for this variation Fundamentally it is puzzling that great powers fear oil coercion at all because the global market makes oil sanctions very difficult to enforce Rosemary A Kelanic argues that two variables determine what strategy a great power will adopt the petroleum deficit which measures how much oil the state produces domestically compared to what it needs for its strategic objectives and disruptibility which estimates the susceptibility of a state s oil imports to military interdiction that is blockade Because global markets undercut the effectiveness of oil sanctions blockade is in practice the only true threat to great power oil access That combined with the devastating consequences of oil deprivation to a state s military power explains why states fear oil coercion deeply despite the adaptive functions of the market Together these two variables predict a state s coercive vulnerability which determines how willing the state will be to accept the costs and risks attendant on various potential strategies Only those great powers with large deficits and highly disruptible imports will adopt the most extreme strategy direct control of oil through territorial conquest

**Demons and Demos** Anupma Logani Kulkarni, 2005 *The Construction of the Rule of Law in Nascent Democracies* Rebecca Bill Chavez, 2001 **Journal of Politics & International Affairs**, 2009 Middle Powers and Accidental Wars Bernard Fook Weng Loo, 2005 The traditional understanding of strategic stability as a condition wherein adversarial states refrain from waging a strategic war is in the first place flawed as it conflates the concept with the wider issue of causes of war it places too great an emphasis on arms racing and crisis management and it has focused too much on nuclear strategy This study situates the concept directly with the phenomena of accidental or inadvertent wars and proposes an understanding of

strategic stability as a condition wherein policy makers do not feel pressured into knee jerk decisions concerning the use of military force This study proposes a framework of conventional strategic stability It includes a geographic and strategic cultural milieu that frames the processes by which policy makers and strategic planners identify and assess the threat posed by potential adversaries It directs attention away from armaments to other military strategic factors such as interpretations of strategic doctrines and intelligence and early warning processes how domestic and external political conditions provide clues as to how and why strategic stability either maintains or fails because decisions for war are ultimately political in nature *Encyclopedia of Case Study Research: L - Z* Albert J.
