Appraising the Human Developmental Sciences Gary W. Ladd, 2007 This volume sets out to celebrate the Quarterly's significant contribution to developmental research and to highlight the advances made in the field since the early 1950s. The year 2004 marked the fiftieth anniversary of the Merrill Palmer Quarterly, *A Journal of Developmental Psychology*, providing an occasion to celebrate the journal's heritage and its long history of scholarly contributions to its field. This volume celebrates this milestone by bringing together twenty-three distinguished essays that showcase past accomplishments, current progress, and future challenges in the human developmental sciences. The essays presented in this volume offer perspectives on many of the research domains and specialty areas that have been prominent in MPQ's history. Accordingly, chapters are organized around ten conceptual themes including methodological and interpretive considerations, cognitive development and learning, temperament and emotional development, children's social development and peer relations, family relations, moral development, the nature/nurture debate, and behavioral genetics, cultural psychology, early child care and school readiness, and evidence-based programming and public policy. In addition, an introductory chapter provides a historical overview of MPQ, examining the events, persons, institutional forces, and publication trends that brought the journal into existence and have contributed to its success and longevity. These commentaries are accessible and of interest to all who work with infants, children, adolescents, and families. As a result, this volume will appeal to researchers and professionals alike.

Constructing a Multidigit Concept of Numbers Joan A. Donohoo Cotter, 1996 *Psychology* Robert J. Sternberg, 2001 In this book, Robert J. Sternberg, a highly respected expert in psychology and intelligence, gives students a comprehensive introduction to psychology while emphasizing the development of their critical, creative, and practical thinking. Throughout the text, students are asked to think critically, creatively, and practically when considering topics.

Teaching Number Robert J. Wright, 2002-03-22 As a classroom teacher, I found the stages and instructional strategies very helpful in identifying students' progress along mathematical development levels. *Teaching Children Mathematics*. I have tried many of the suggestions and teaching procedures and seen short and long-term success both with individuals and groups. It will be a valuable resource for the primary school teacher, especially with older children who need accurate and specialized development. A sound approach to mathematics teaching could be developed from conscientious use of this resource. Matthew Alcock, *Primary Practice*. This is a highly detailed and well-structured text to support the teaching of number skills at the primary phase, with particular emphasis given to the 4-8 years age range. From the outset, the authors take great care to set out their credentials and the scope of their writing. It is clear that the guidance, teaching approach, and activities offered in the book have been thoroughly tried and tested throughout the 1990s during research and development work with teachers in Australia, England, and the USA in the Mathematics Recovery (MR) and Count Me In Too (CMIT) projects.

Mathematics in Schools This book provides a structured approach to the teaching of early numeracy which has been extensively developed through the Mathematics Recovery and Count Me In Too Projects in Australia the United Kingdom and the United States The book lets teachers identify where their students are in terms of number skills and sets out a strategy for developing their knowledge The authors show how to advance children s learning across five stages emergent perceptual figurative initial number and facile number This provides for increasingly sophisticated number strategies Teaching procedures are organised into key teaching topics and each includes a clearly defined purpose detailed teaching procedures and learning tasks application in whole class small group and individualised settings a link to the Learning Framework in Number The activities have been tested by practitioners in Australia the United States and the United States and can be used within each country s numeracy strategy This book will be useful to primary teachers especially in the early years mathematics co ordinators heads of school mathematics advisers learning support personnel lecturers and educational psychologists This book builds on the assessment of children s strategies set out in the authors Early Numeracy Paul Chapman Publishing 2000
